

50pick

Testing runbook

START

1. Open /admin/payments.
2. Under PAYMENT PROVIDER, click SELCOM.

3. Done. Live immediately.

STOP — CHOOSE ONE

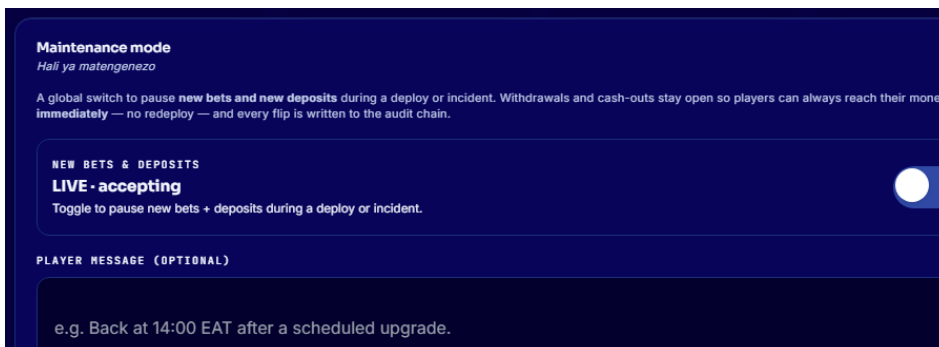

Option A · Maintenance mode

/admin/system -> Maintenance mode ON

Stops: new bets + new deposits. Stays open: withdrawals.

Best for a pause. Nothing new starts, players can still reach their money, and restarting is one switch.

Restart: Maintenance mode OFF.

Option B · Payment provider

/admin/payments -> click MOCK (TEST)

Stops: deposits + withdrawals.

Best for closing money completely. No money can enter or leave the platform.

Betting continues. Anyone with a balance keeps playing for real money.

Restart: click SELCOM again.

To stop everything, use both.

Before either one, open /admin/settlement and wait until it is empty.

CHECK DAILY

/admin/system -> Bet queue card. TURNED AWAY must stay 0.

If it is above 0, players were refused because the platform was busy. Report it.

DURING TESTING

Deposits and betting work. Cash-out is closed.
