

50pick admin guide

Contacts and SMS campaigns — step by step, with the page for every step

v1.2 · 2026-10-04 · for staff with the Admin or Growth role · <https://50pick.tz/admin>

Before you start

- These screens are for staff with the Admin or Growth role.
- No SMS is sent from these screens until the owner switches sending on.
- Every change you make is recorded with your name and the time.
- Some roles see phone numbers partly hidden (like +255••••78) — that is on purpose.

1 · Signing in and finding the screens

1 Sign in to the admin console

Where: <https://50pick.tz/auth/admin>

1. Open the address above.
2. Enter your staff phone number and password, then your 2-step code if asked.
3. You land on the admin console.

The screenshot shows the 'Admin sign in' page for 50pick.tz. The page has a dark blue background with a white header bar. The header bar contains the 50pick logo, a list of roles (Masoko, Juu na Chini, Mubashara, Matokeo, Jedwali la Washindi), and buttons for 'SW', 'Ingia', and 'Jisajili'. Below the header, the page title 'Admin sign in' is displayed in white, with the subtitle 'Kuingia kwa wafanyakazi' underneath. A central white box contains the login form. The form has a title 'For 50pick staff accounts only' and a note: 'Step 1: phone OTP. Step 2: 6-digit authenticator code (RFC 6238). Both events audited.' The form fields are labeled 'PHONE · SIMU' and 'PASSWORD · NENOSIRI'. The phone field contains '+255 712 345 678' and the password field contains '••••••'. A blue 'Sign in · Ingia' button is at the bottom of the form. Below the button, a small note states: 'If TOTP is enabled on your account you will be prompted next.'

2 Find Contacts and SMS campaigns in the menu

Where: The menu on the left → Growth → Contacts, and Growth → SMS campaigns

1. On a computer the menu is on the left. On a phone, open it with the menu button at the top.
2. Under Growth you will find Contacts (the book of numbers) and SMS campaigns (the messages).

2 · The contact book

Growth → Contacts is the book of phone numbers 50pick can reach. It shows how many contacts there are, lets you search and filter, and lets you add, edit, tag and export.

3 Read the contact book

Where: Growth → Contacts

1. The tiles at the top count the book. Roles that may read numbers also see how many gave consent and how many are stopped.
2. The filters on the left (or at the top on a phone) narrow the list by operator, list or tag.
3. The search box finds a name, or a whole phone number in any spelling.
4. Each row is one contact. Tick rows to act on several at once.

4 Open Add contact

Where: Growth → Contacts → Add contact (top right, marked in red)

1. Press Add contact. The form opens over the list, with the cursor in the phone box.

5 Fill it in and save

Where: Growth → Contacts → Add contact

1. Type or paste the phone number in any spelling — 0712 345 678, +255 712 345 678 or 255712345678. The box keeps the nine digits after +255.
2. As soon as the number is complete, the form shows its network (Vodacom, Airtel, Yas, Halotel...) and checks the book.
3. Add a name, an email, notes and tags if you have them — each is marked (optional), and the counters under the boxes show the room left.
4. Press Save contact. A message confirms it and the new contact appears in the list.

CONTACTS · ANWANI

Add a contact

PHONE NUMBER

+255

754 321 987

VODACOM

A Tanzanian mobile number, issued from Vodacom's range (M-Pesa).

NAME (OPTIONAL)

Neema Mushi

11 of 120 characters

EMAIL (OPTIONAL)

neema@example.com

Stored in lower case.

NOTES (OPTIONAL)

0 of 1,000 characters

TAGS (OPTIONAL)

vip, dar

Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower case.

2 of 20 tags

CONSENT

NOT RECORDED

This form never records consent; a contact with no consent recorded is never sent marketing.

Cancel

Save contact

6 When the number is already in the book

Where: Growth → Contacts → Add contact

1. The form says the number is already in the book and offers "Open the existing contact →".
2. Open it and edit that contact instead of adding a second one.

Save contact

7 When the form shows a problem

Where: Growth → Contacts → Add contact (or a contact's Edit)

1. Each box is checked as you type — an email when you leave its box — and a problem is written in red under its own field.
2. While anything needs fixing, Save waits, and the reason is written beside it (outlined in red). Fix what it says and Save comes back.
3. A name or a tag can't hold a phone number — the number belongs in the phone box.

3 · Finding contacts

9 Search by name or by number

Where: Growth → Contacts → the search box

1. Type part of a name to find matching contacts.
2. Type a WHOLE phone number, in any spelling, to find that one contact — the line under the box says “Whole number — matched exactly”. Part of a number never searches numbers (it keeps hidden numbers hidden).
3. The line above the table says what the list is showing.

10 Filter the list

Where: Growth → Contacts → the filters

- 1. Press an operator, a list or a tag to show only those contacts.
- 2. Press it again, or Clear, to show everyone.

4 · Working on many contacts at once

11 Select contacts and choose an action

Where: Growth → Contacts → tick rows → the bar that appears

- 1. Tick the boxes on the rows you want (or “select all matching” to take every contact the filter shows).
- 2. The bar shows the actions: Tag, Untag, Add to list, Record a withdrawal, Suppress and Remove.

12 Confirm — the server counts first

Where: Growth → Contacts → an action → the confirmation

1. Up to 50 ticked rows: the confirmation names them. More than 50, or any “select all matching”: type the number of contacts the server counted.
2. Press the action's button. A message says how many changed.

Suppress stops a number from EVER receiving marketing, and nobody can undo it — use it when a person or the Gaming Board asks 50pick to stop.

Remove deletes the contacts from the book; the records of consent and stops are kept.

13 Export the list

Where: Growth → Contacts → Export CSV (top right)

1. Filter the list first if you want only part of it.
2. Press Export CSV. The file downloads to your computer.
3. Roles that can't read numbers get a file with the numbers hidden.

5 · SMS campaigns

Growth → SMS campaigns is where messages are written and kept. Today you can write, check, save and reopen drafts. Sending starts once the owner switches SMS on.

14 See the campaigns

Where: Growth → SMS campaigns

1. Every campaign is listed with its status. A draft is a message still being written.
2. Press New SMS campaign to start one.

15 Write the message

Where: Growth → SMS campaigns → New SMS campaign

1. Give the campaign a name (only staff see it).
2. Write the Swahili message — it is required, because every recipient can receive it. It must start with “50pick”.
3. English is optional: players whose account language is English get it; everyone else gets Swahili.
4. A campaign message must fit in ONE SMS. The counter under each message shows the room left before the footer; the stop link is added for you and counted.

16 Fix what the composer marks

Where: Growth → SMS campaigns → the message

1. A character outside the plain SMS alphabet (a curly quote, an emoji) turns the message into Unicode, which fits far fewer characters. The composer names the character; press “Replace with plain characters” or retype it.
2. Too long for one SMS? The composer says how many characters you have before the required footer.

The screenshot shows the 'New SMS campaign' page in the 50pick admin interface. The page has a dark blue header with navigation links and a sidebar on the left. The main content area is titled 'New SMS campaign' and contains several sections:

- Message**: A section with a 'Campaign name' field containing 'October welcome'.
- Swahili Message**: A section with a text area containing '50pick: Karibu! Bashiri mechi za wikendi hii na ushinde "leo".'
- Unicode**: A section with a text area containing 'Unicode leaves no room once the required footer is added — replace: " (curly opening double quote), " (curly closing double quote).'
- Replace with plain characters**: A button labeled 'Replace with plain characters'.
- English Message (Optional)**: A section with a text area containing '31 characters are kept for the source line a contact-book number needs — its wording is not set yet.'

17 Choose who it is for

Where: Growth → SMS campaigns → Audience

1. The audience is the contact book, or the part of it a filter on the Contacts page chose.
2. A campaign always goes to a group — never to one phone number.

The screenshot shows the 'Audience' section of the 'New SMS campaign' page in the 50pick admin interface. The page has a dark blue header with navigation links and a sidebar on the left. The main content area is titled 'Audience' and contains several sections:

- English Message (Optional)**: A section with a text area containing '31 characters are kept for the source line a contact-book number needs — its wording is not set yet.'
- Audience**: A section with a text area containing 'Everyone in the contact book — no filter.'
- Test send**: A section with a text area containing 'To +255***01 (your own number)'
- Send the Swahili test**: A button labeled 'Send the Swahili test'

18 Save the draft

Where: Growth → SMS campaigns → New SMS campaign → Save draft

1. Press Save draft. The line beside it says when it was saved — and that nothing was sent.

19 Open a draft again

Where: Growth → SMS campaigns → the draft's name in the list

1. Every saved draft is in the list. Press its name to open it again, exactly as you left it.

No English text — everyone gets the Swahili message.

Sender 50pick — set on the server; it can't be changed here.

Save draft

Draft saved 13:33 — nothing was sent.

Audience

Everyone in the contact book — no filter.

Nothing is counted or sent from this page. Who will receive it — after consent, stops and age — is counted and confirmed before any campaign starts.

Test send

To +255****01 (your own number)

Marketing SMS are not switched on yet — a test is refused until the owner switches them on.

Swahili, as it will be sent to you

50pick: Karibu! Bashiri mechi za wikendi hii na ushinde.
50pick 18+ 0808110811 Acha: 50pick.tz/s/xxxxxxxx

Your stop link is made the first time you send a test; until then it shows as xxxxxxxx.

Send the Swahili test

Up to 3 tests at once, then one every 10 minutes.

6 • The SMS balance

21 See how much SMS credit is left

Where: The menu → System → the “SMS credit” tile at the top

- 1. The tile shows the credit left with the SMS company, in TZS, read live.
- 2. Each SMS costs about TZS 6. Login and withdrawal codes use the same credit, so never let it run out.
- 3. The table below explains every state the tile can show.

7 · On a phone

22 The same screens on a phone

Where: Any of the screens above, on a phone's browser

- 1. Everything works on a phone: the filters move to the top, and the menu opens from the top bar.

The SMS balance — what the tile can show

The tile shows	What it means	What to do
A figure such as TZS 250,000, with no colour	The live balance, read just now.	Nothing — keep an eye on it before a big campaign.
A figure in amber, "low"	The credit is below the alert level.	Ask the owner to top up soon.
A figure in red, "below floor"	The credit is below the floor kept for login and withdrawal codes; marketing must wait.	Ask the owner to top up now.
"Checking with Blackball... reload in a few seconds"	The balance is being read.	Reload the page after a few seconds.
"Couldn't read the balance"	The SMS company did not answer this time.	Reload later. If it stays, tell the owner.
A red dash with a setup note (keys, sender ID, provider)	The SMS connection is not set up correctly on the server.	Tell the owner — this is a technical setting, and login codes may be affected.

Messages you may see

Every message below is copied from the platform as it is today. Find the message, then do what the last column says.

Where	Message	What it means	What to do
Add / edit contact	<i>This number is already in the book.</i>	The number is a contact already.	Press “Open the existing contact →” and edit that one.
Add / edit contact	<i>This number can't be added to the book.</i>	This number was erased from 50pick at the person's request.	Do not add it again.
Add / edit contact	<i>A name can't hold a phone number — remove the number from the name.</i>	Names show to every staff role, while numbers are hidden for some.	Remove the digits from the name; the number goes in the phone box.
Add / edit contact	<i>A tag can't hold a phone number.</i>	Tags show to every staff role.	Use a word, not a number (e.g. “vip”, “event-oct”).
Add / edit contact	<i>A tag can hold only letters, digits, spaces, - and _.</i>	The tag has a character tags can't hold.	Remove the character.
Add / edit contact	<i>This doesn't look like an email address (name@example.com).</i>	The email is not a complete address.	Fix it, or leave the email empty.
Add / edit contact	<i>Someone changed this contact after you opened it, so nothing was saved. Reload to see the latest version, then make your change again.</i>	Two people edited the same contact.	Reload, check their change, then make yours.
Add / edit contact	<i>Your role can view contacts but not add or change them — ask an officer with Growth access.</i>	Your role is view-only here.	Ask an officer with Growth access, or the owner.
Add / edit contact	<i>That paste is longer than a phone number — paste the number alone.</i>	The paste held more than a number — words, or a second number.	Copy just the number and paste it again.
Add / edit contact	<i>Discard what you typed? Nothing has been saved yet.</i>	You pressed Cancel or ✕ with typing in the form.	Keep editing to go back, or Discard to close without saving.
Phone number	<i>A Tanzanian number has nine digits after +255; this one has 8. Check whether some digits were cut off.</i>	A digit or more is missing.	Check the number with the person and type it again.
Phone number	<i>This is an international number outside Tanzania (country code +254...). 50pick sends only to Tanzanian mobile numbers.</i>	Only Tanzanian mobiles can be added.	Ask for their Tanzanian mobile number.
Bulk actions	<i>Type one tag at a time — a comma, ; or separates tags.</i>	The bulk Tag box takes one tag.	Type a single tag.
Bulk actions	<i>A list name can't hold a phone number — remove the number from the name.</i>	List names show to every staff role.	Name the list with words.

Where	Message	What it means	What to do
Bulk actions	<i>Choose a list, or name a new one.</i>	Add to list needs a list.	Pick a list in the box, or type a new list's name.
Bulk actions	<i>The selection changed while it was being read: it now holds ... contacts, not Nothing was changed; review it again.</i>	Contacts joined or left the selection between the count and the action.	Review it again — the confirmation counts afresh.
SMS campaign	<i>Give the campaign a name — only staff see it.</i>	The name is empty.	Type a name.
SMS campaign	<i>The Swahili message is required — it is the one every recipient can be sent.</i>	The Swahili message is empty.	Write the Swahili message.
SMS campaign	<i>A campaign name can't hold a phone number — the digits ending 78 read as one, and campaigns are kept for good.</i>	Campaigns are never deleted, so a number in a name would be kept for ever.	Name the group it is for; write other figures with a comma or a slash.
SMS campaign	<i>A campaign goes to a group, never to one phone number — take the number out of the audience. To see the message on a phone, use the test send: it goes to your own number.</i>	The audience is one phone number.	Choose a group (a filter); use the test send for one phone.
SMS campaign	<i>The character “...” is not in the GSM alphabet, which cuts a message from 160 characters to 70. Replacing it is usually enough.</i>	A special character (curly quote, emoji...) makes the SMS hold far fewer characters.	Press “Replace with plain characters”, or retype it.
SMS campaign	<i>This is 2 messages, and the limit is 1 — you have ... characters before the required footer, and this uses</i>	The message is too long.	Shorten it until the counter is within the limit.
SMS campaign	<i>Nothing to save — no changes since the last save.</i>	The draft is already saved as it is.	Nothing — your draft is safe.
SMS campaign	<i>Your role can't write or test SMS campaigns — ask an officer with growth access.</i>	Your role can't use the composer.	Ask an officer with Growth access, or the owner.
Any screen	<i>A message that says something failed — for example “Couldn't save — your text is still here. Try again.”</i>	The server did not answer this time. Nothing you typed is lost.	Try again. If it keeps failing, reload the page; if it still fails, tell the owner.
Test send	<i>Marketing SMS are not switched on yet. The owner switches them on before the first send.</i>	Sending is still off for everyone.	Nothing — the owner switches it on before the first campaign.
Test send	<i>Save first — the test sends the saved text.</i>	The test uses the saved version of the message.	Press Save draft, then the test.
