

50pick admin guide

Contacts and SMS campaigns, step by step

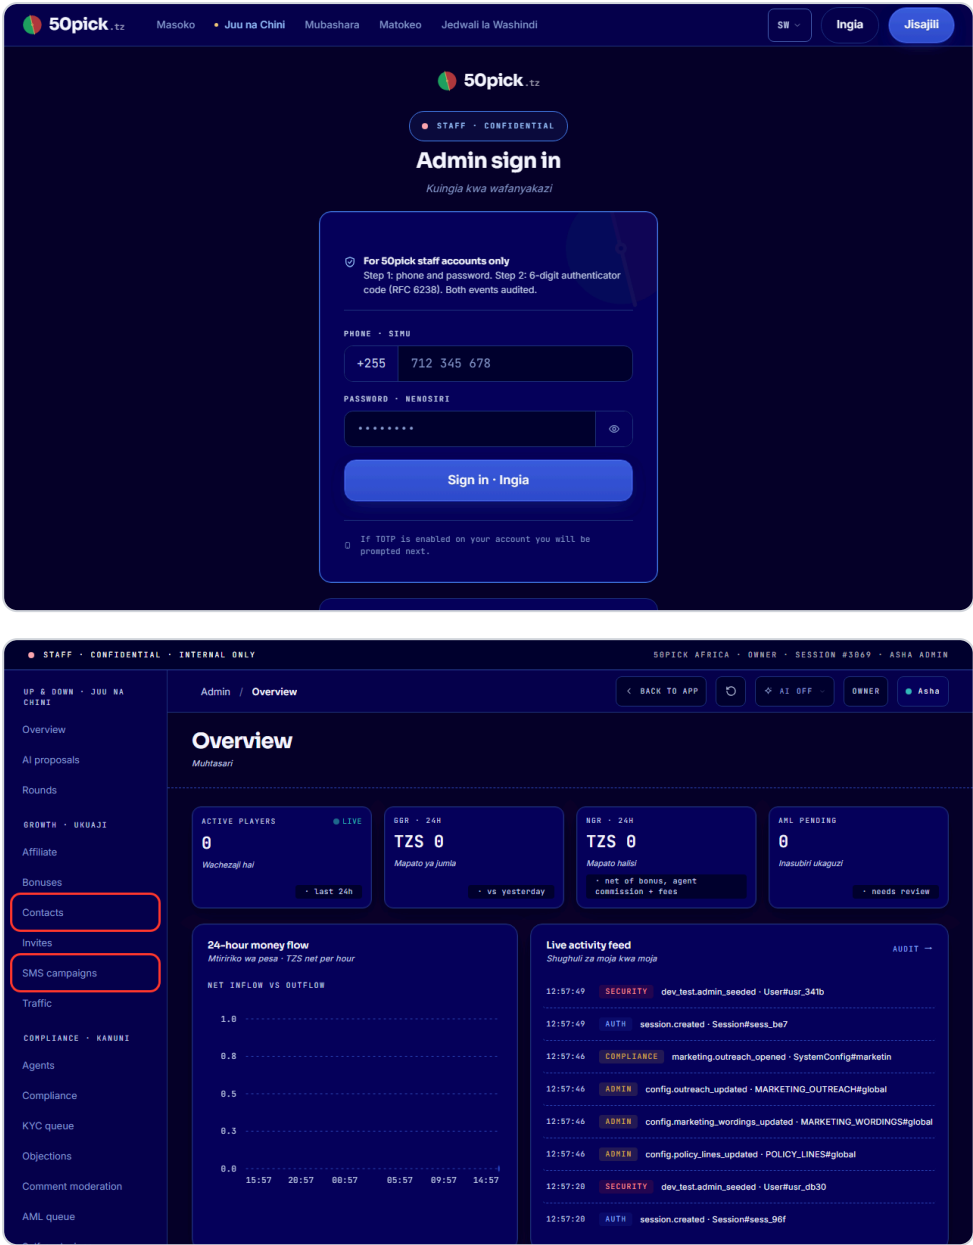

v2 · 2026-10-09 · <https://50pick.tz/admin>

1 · Sign in

1 Sign in to the admin console

https://50pick.tz/auth/admin

- 1. Enter your staff phone number and password, then press Sign in.
- 2. Contacts and SMS campaigns are in the menu under Growth.

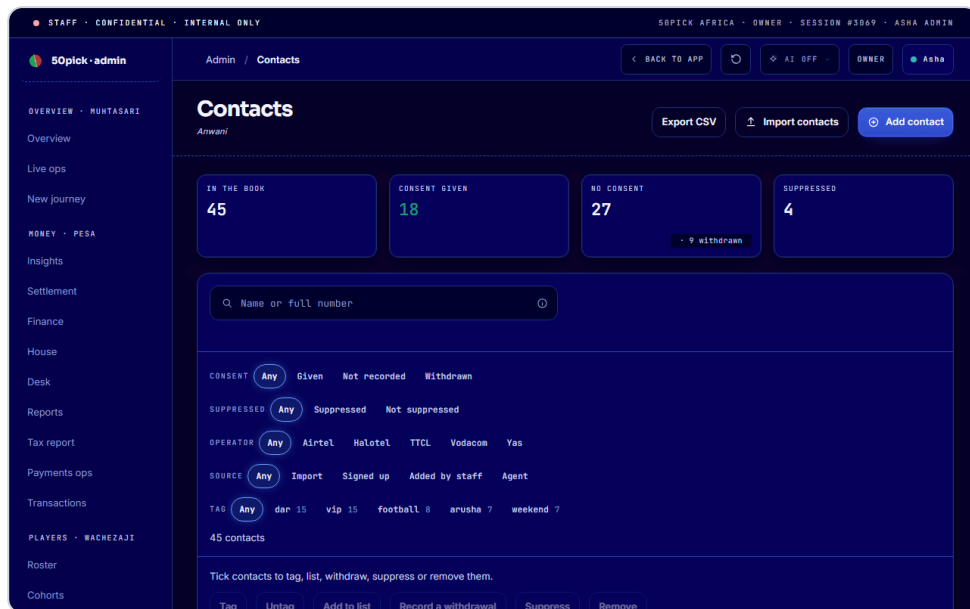

2 · The contact book

2 Read the book

Growth → Contacts

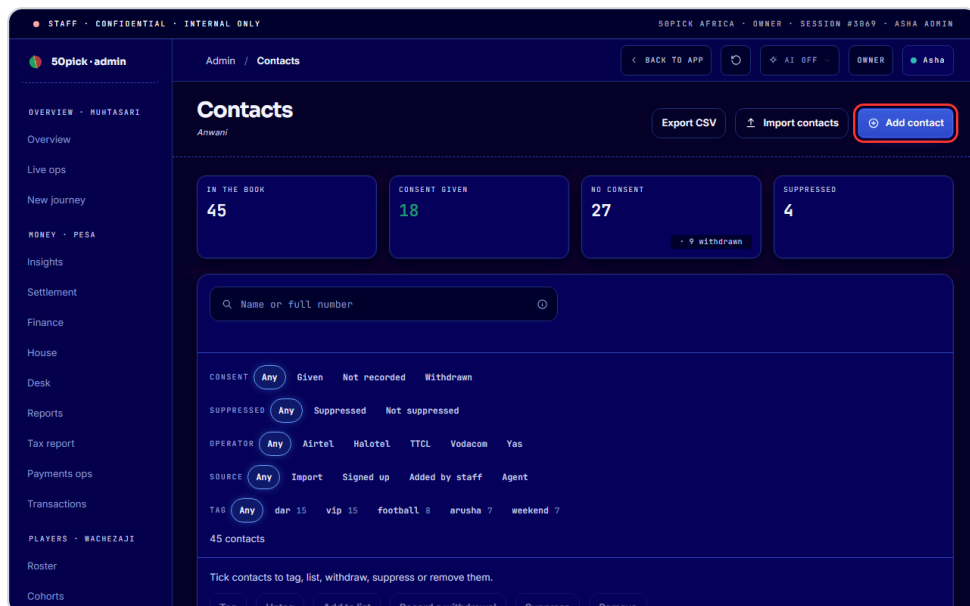

1. The tiles at the top count the book.
2. The filters narrow the list by operator, list or tag. The search box finds a name, or a whole phone number in any spelling.
3. Each row is one contact. Tick rows to act on several at once.

3 Add one contact

Growth → Contacts → Add contact

1. Type or paste the number in any spelling — 0712 345 678, +255 712 345 678 or 255712345678.
2. The form shows the network and checks the book as soon as the number is complete.
3. Name, email, notes and tags are optional. Press Save contact.

Add a contact

PHONE NUMBER

VODACOM

A Tanzanian mobile number, issued from Vodacom's range (M-Pesa).

NAME (OPTIONAL)

11 of 120 characters

EMAIL (OPTIONAL)

Stored in lower case.

NOTES (OPTIONAL)

0 of 1,000 characters

TAGS (OPTIONAL)

Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower case.

2 of 20 tags

CONSENT

☐ NOT RECORDED

This form never records consent. A contact is messaged only with their own recorded consent or through a list whose licence basis is recorded — and never after a stop.

4 A number already in the book

Growth → Contacts → Add contact

1. The form says so and offers “Open the existing contact →”. Edit that contact — the book never holds a number twice.

CONTACTS · ANWANI

×

Add a contact

7 Find contacts

Growth → Contacts → the search box and the filters

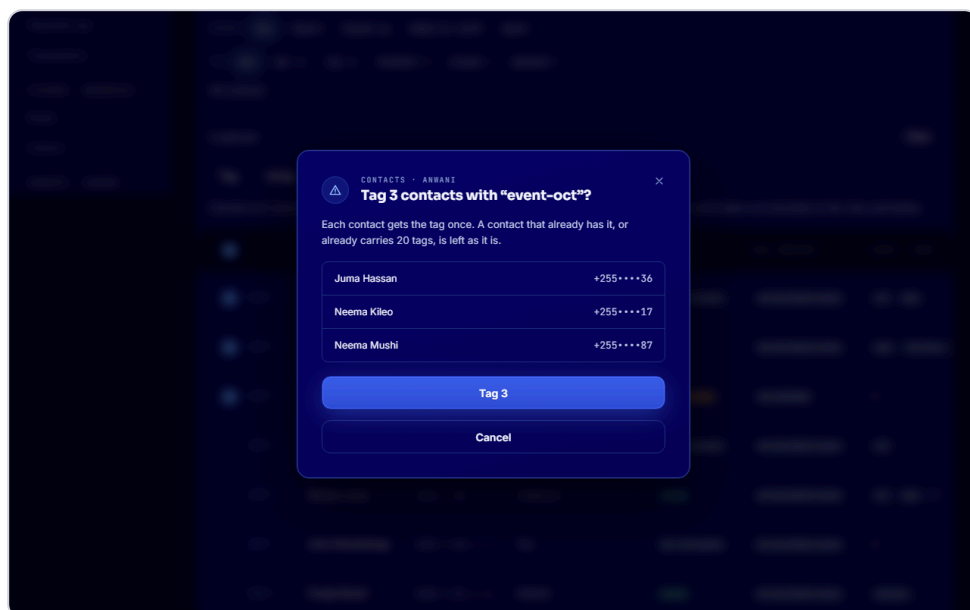

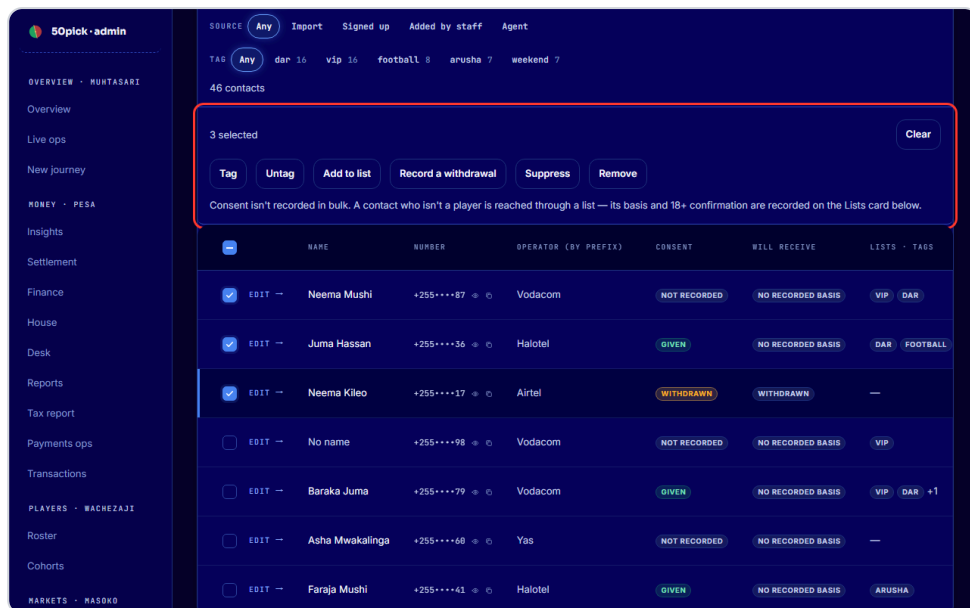

1. Type part of a name, or a WHOLE number in any spelling (the line under the box says “Whole number — matched exactly”).
2. Press an operator, a list or a tag to show only those contacts; press it again, or Clear, to show everyone.

8 Act on many contacts: tag, list, stop, remove

Growth → Contacts → tick rows → the bar that appears

1. Tick the rows, or “select all matching” to take every contact the filter shows.
2. Choose Tag, Untag, Add to list, Record a withdrawal, Suppress or Remove.
3. Up to 50 rows, the confirmation names them; more than that, type the number the server counted. Then press the action's button.

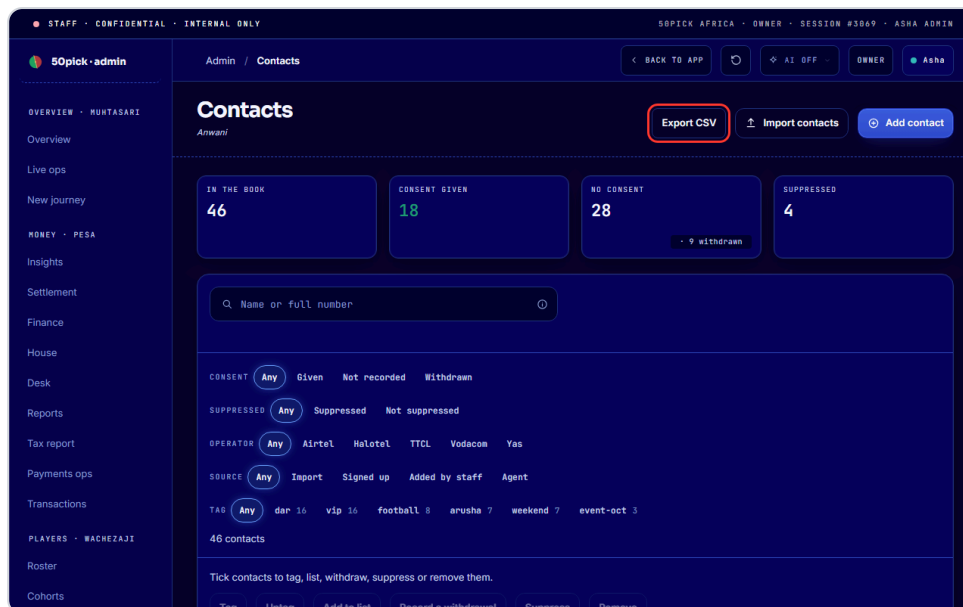

Suppress stops a number from EVER receiving marketing, and it can't be undone — use it when a person asks 50pick to stop.

Remove deletes contacts from the book; the records of their consent and stops are kept.

9 Export the book

Growth → Contacts → Export CSV

1. Filter first if you want only part of the book, then press Export CSV. Roles that can't read numbers get them hidden.

3 · Import contacts from a file

10 Before a big import

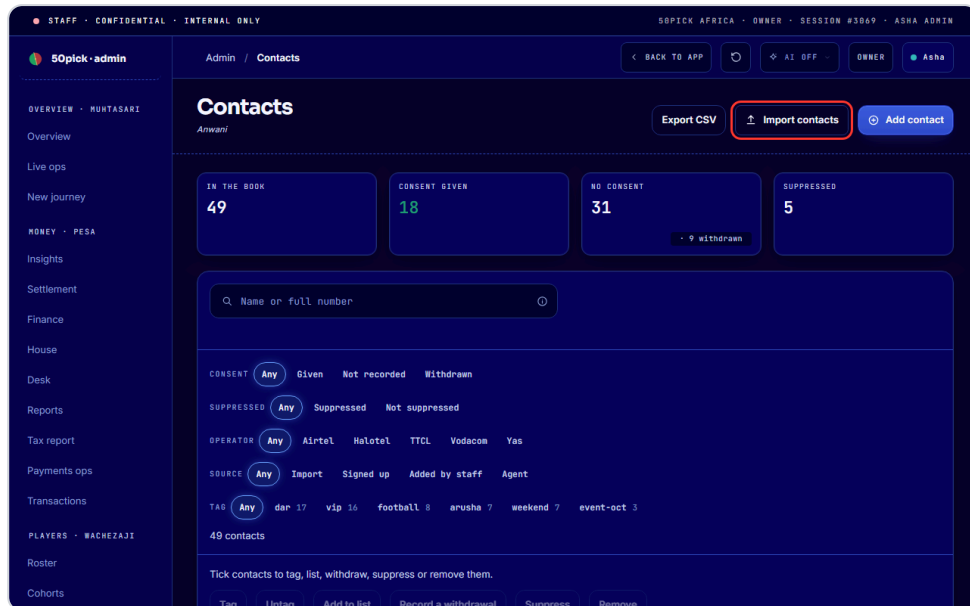

Growth → Contacts

1. First a test file of 20 to 50 contacts. Check the result and open a few of them in the book.
2. Then files of up to 5,000 rows, one import at a time, checking each result before the next. Once you trust your files, bigger ones are fine — one import takes up to 200,000 rows.
3. Press Export CSV first, so you keep a copy of the book as it was.
4. Never import while a campaign is being confirmed or started — new people in its audience stop it from starting.

11 Choose the file

Growth → Contacts → Import contacts

1. Drop or choose an Excel file (.xlsx), a CSV, or a phone's contacts file (.vcf) — or press Paste instead and paste cells from Excel or a chat.
2. An Excel file can be up to 700 KB; a CSV or a contacts file has no size limit. Old .xls, .ods, Numbers, PDFs and pictures can't be read — save the list as .xlsx or CSV first.
3. If the window closes or the page reloads, open Import contacts again: an unfinished import carries on from where it stopped.

12 Check the columns

Import contacts → The columns

1. Each column shows its first values and what it will be read as — Phone, Name, Email, Tags, Notes or Not used. Press Change on any that is wrong.
2. A file that starts with a contact instead of column names is recognised; make sure the phone column is the right one.
3. Press Next. The rows are uploaded — nothing is in the contact book yet.

CONTACTS

The columns

Step 2 of 4 · The columns

Check what each column will be read as. Change any that are wrong.

9 rows read from contacts-october.csv.

☐ The first row is a contact, not column names

COLUMN	FIRST VALUES	READ AS
A Phone	+255***10 · +255***01 · +255***02	PHONE Change
B Name	Neema Mushi · Asha Mwakalinga · Chausiku Ally	NAME Change
C Email	asha@example.com	EMAIL Change
D Tags	dar · vip, dar · arusha	TAGS Change
E Notes	Empty	NOTES Change

Choose another file

Next — upload 9 rows

13 Read the check

Import contacts → Check before importing

1. Five boxes add up to your file: New to the book, Already in the book, Repeated in this file, Can't be imported as written, Could not be read.
2. A number repeated in the file is imported once — its first row. Each problem row is listed with its row number in your file and the reason.
3. Nothing has been written to the book yet. If many rows can't be used, fix the file and start again.

The check

NEW TO THE BOOK
2

ALREADY IN THE BOOK
4

REPEATED IN THIS FILE

+255****18

NUMBERS ALREADY IN THE BOOK

4 numbers in your file are already in the contact book. Choose what happens to them.

☒ **Keep what's in the book**
RECOMMENDED
Nothing about these contacts changes. New numbers are still added.
No contact changes

☐ **Use the file's version**
The file's name, email and notes replace what the book holds. Tags are added, never removed.
1 contact changes

☐ **Only fill in what's missing**
Only details the book doesn't have yet are filled in from the file.
1 contact changes

A blank cell never erases anything. Numbers on the stop list and erased people are never changed.

WHAT WOULD CHANGE Showing 1 of 1

Each contact below differs from your file. Set one apart from the choice above if it should be treated differently.

ROW	CONTACT	WITH THIS CHOICE	SET APART
Row 3	+255****01 Asha	Stays as it is	☐ Use the file's version for this contact

ADD THE CONTACTS TO A LIST

Offers reach people through a list whose basis and 18+ confirmation are recorded on the Lists card.

☒ **Don't add them to a list**
The contacts go into the book only.

☐ **A new list**

This import: 2 new · 0 updated · 5 kept as they are.

Discard this import

Import 7 rows

14 Choose what happens to numbers already in the book

Import contacts → Numbers already in the book

- 1. Keep what's in the book (recommended) — nothing about those contacts changes; new numbers are still added.
- 2. Use the file's version — the file's name, email and notes replace the book's; tags are only added. You confirm it, and there is no undo.
- 3. Only fill in what's missing — only details the book doesn't have yet are filled in.
- 4. A blank cell never erases anything, and numbers on the stop list and erased people are never changed. Only a role that can see phone numbers can update contacts already in the book.
- 5. To send these people offers, add them to a list here; a list is ready for offers once its basis and 18+ confirmation are recorded on the Lists card.

4 · Before anything is sent

16 Check the SMS credit

System → the “SMS credit” tile

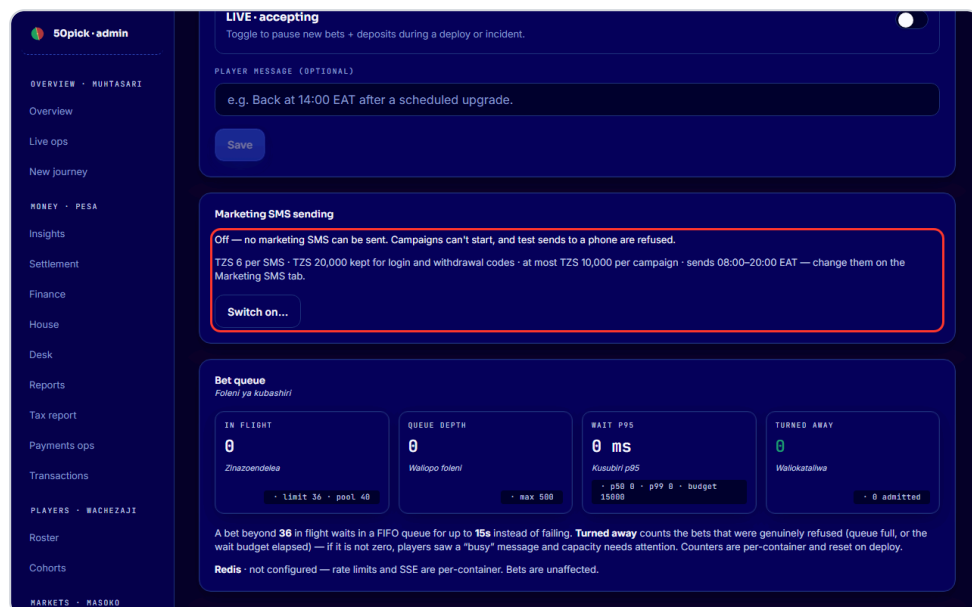

1. The credit left with the SMS company, read live. Each SMS costs about TZS 6.
2. Login and withdrawal codes use the same credit. Part of it is kept for them, and a campaign pauses rather than spend it.

17 The owner's switch

System → the “Marketing SMS sending” card

1. Nothing is sent while marketing SMS are switched off — not a campaign, not a test.
2. The owner presses Switch on..., chooses how long (30 minutes to 24 hours) and confirms. It switches itself off at the end; Switch off now stops it at once.

CONFIRM

Switch on marketing SMS?

×

For how long

☐ 30 minutes

☐ 1 hour

☒ 2 hours

☐ 4 hours

☐ 8 hours

☐ 24 hours

While it is on, any campaign that has been started sends, and every test send costs real SMS credit.

It switches itself off at **17:58 EAT**.

Switch on

Cancel

18 The owner's settings

System → the “Marketing SMS” tab

1. The price per SMS, the credit kept for login and withdrawal codes, the most one campaign may cost, and the sending hours (08:00–20:00 EAT unless the owner changes them).

A resolved market is adjudicated, not paid. Its money stays in the pool until the objection window closes with no objection standing — then its own per-market settle timer pays it. “Awaiting window” is too early to pay. “Frozen by objection” is waiting on a ruling at /admin/objections. “Timers armed” counts every market with a pending scheduled transition (close, resolve or settle); the lifecycle reconciler re-arms any that go missing, and /admin/settlement is the human fallback.

Diagnostics

Marketing SMS

What a marketing SMS costs, the credit kept back so login and withdrawal codes always send, the most one campaign may spend, and the hours campaigns send in. Every save is recorded in the audit log.

PRICE PER SMS (TZS)

6

Used to estimate a campaign's cost until our own sends measure it. Not measured yet. From 1 to 1,000, at most two decimals.

KEPT FOR LOGIN AND WITHDRAWAL CODES (TZS)

20000

Marketing stops before the SMS credit falls below this, so codes keep sending. Whole shillings, at least 50.

MOST ONE CAMPAIGN MAY SPEND (TZS)

10000

A campaign whose cost could pass this can't be confirmed. Whole shillings, from 100 to 10,000,000.

SEND WINDOW STARTS (EAT)

08:00

SEND WINDOW ENDS (EAT)

20:00

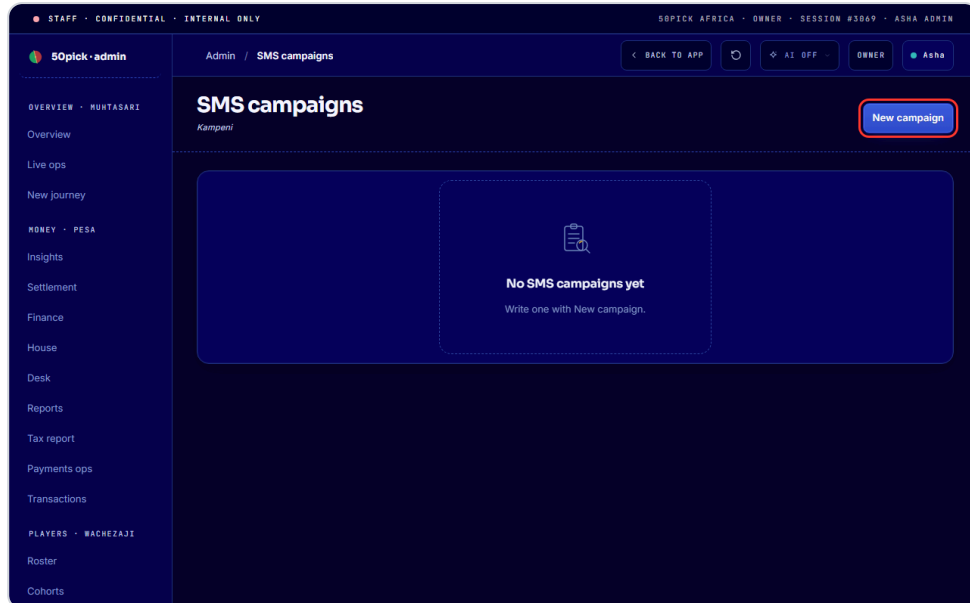

50pick's own rule — no law sets these hours. If the Responsible Gambling page states hours, change its line on the Public policy lines tab too.

5 · Write a campaign

19 Start a new campaign

Growth → SMS campaigns → New SMS campaign

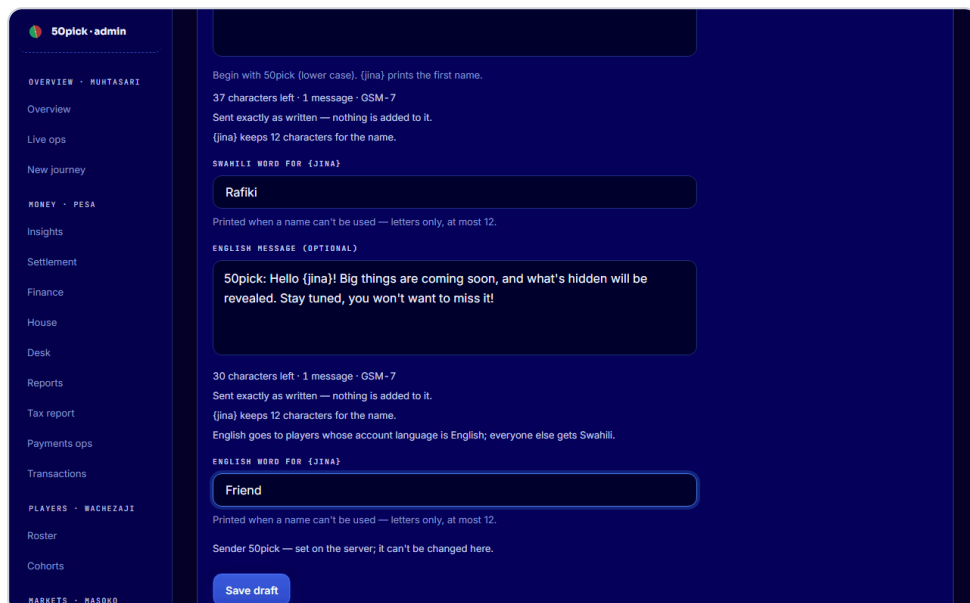

1. Every campaign is listed with its status. A draft is still being written.

20 Write the message

Growth → SMS campaigns → New SMS campaign

1. Name the campaign — only staff see the name.
2. Write the Swahili message; it must begin with 50pick. {jina} prints the person's first name — then give the word printed when a name can't be used (for example Rafiki).
3. English is optional: players whose account language is English get it, everyone else gets Swahili.
4. The message must fit in ONE SMS, and it is sent exactly as you write it — nothing is added. The counter shows the room left (12 characters are kept for {jina}).

21 Fix what the composer marks

Growth → SMS campaigns → the message

1. A curly quote or an emoji makes the message hold far fewer characters. Press “Replace with plain characters”, or retype it.
2. Too long? The composer says how many characters you have.

The screenshot shows the 'New SMS campaign' form in the 50pick admin interface. The form is titled 'New SMS campaign' and has a sub-header 'Kampuni mpya'. It contains several sections: 'Message' with a 'Ujuzi' label, 'CAMPAIGN NAME' with a text input 'Coming soon', a note 'Only staff see it — it is never sent.', 'SWAHILI MESSAGE' with a text input '50pick: Karibu (jina)! Bashiri "leo".', a character count 'Unicode cuts this message to 70 characters — replace: " (curly opening double quote), " (curly closing double quote).', '27 characters left - 1 message - Unicode', 'Forced to Unicode by: " (curly opening double quote), " (curly closing double quote)', a 'Replace with plain characters' button, a note 'Sent exactly as written — nothing is added to it. (jina) keeps 12 characters for the name.', 'SWAHILI WORD FOR (JINA)' with a text input 'Rafiki', a note 'Printed when a name can't be used — letters only, at most 12.', and 'ENGLISH MESSAGE (OPTIONAL)'.

22 Choose who receives it

Growth → SMS campaigns → Audience

1. Choose the contact book, player accounts, or both, then narrow it with a list, a tag, an operator or the other filters.
2. The card counts who will receive it and who won't, with the reason for each (stopped, no consent, can't be sent to...).
3. A campaign always goes to a group — never to one phone number.

The screenshot shows the 'Audience' selection form in the 50pick admin interface. The form is titled 'Audience' and has a sub-header 'Draft saved 16:00 — nothing was sent. Send yourself a test below.' It contains several sections: 'WHO' with radio buttons 'Contact book', 'Player accounts', and 'Both'; 'OPERATOR (BY PREFIX)' with radio buttons 'Any', 'Airtel', 'Halotel', 'TTCL', 'Vodacom', and 'Yes'; 'ADDED' with radio buttons 'Today', 'Yesterday', '7 days', '30 days', 'All time', and 'Custom'; 'CONSENT' with radio buttons 'Any', 'Given', 'Not recorded', and 'Withdrawn'; 'STOP LIST' with radio buttons 'Any', 'On the stop list', and 'Not on the stop list'; 'SOURCE' with radio buttons 'Any', 'Import', 'Signed up', 'Added by staff', and 'Agent'; 'PLAYER' with radio buttons 'Any', 'Players only', and 'Not players'; 'TAG' with radio buttons 'Any', 'u47live-guide', and 'weekend'; 'Contacts matching: Tag: weekend' with a table showing counts for 'ON THIS CAMPAIGN' (10), 'WILL RECEIVE NOW (FORECAST)' (8), 'NOT RECEIVING' (2), and 'CAN'T BE SENT TO' (0); 'Not receiving, by reason' with a table showing counts for 'Stopped (on the stop list)' (1), 'No consent or recorded basis' (1), and 'Withdrew consent' (8).

23 Save, and send a test

Growth → SMS campaigns → Save draft, then Test send

1. Press Save draft — the line beside it says when, and that nothing was sent.
2. Send the test to My own number. The Owner and Compliance can also choose Another number: type it and tick the box that the person who uses it is 18 or older — use a phone whose owner expects the test.
3. The test is the saved message exactly as a recipient will get it. It is sent only while marketing SMS are switched on — up to 3 at once, then one every 10 minutes.
4. Saved drafts are in the list; press a draft's name to open it again.

The first screenshot shows the 'Save draft' step in the 50pick admin interface. The left sidebar contains a navigation menu with categories: OVERVIEW (MUNTASARI), MONEY (PESA), PLAYERS (WACHEZAJI), and MARKETS (MASOKO). The main content area displays a draft titled 'Friend' with a character count of 30. Below the draft name, there are fields for 'ENGLISH WORD FOR (JINA)' and 'Printed when a name can't be used'. A 'Save draft' button is highlighted with a red box, and a message next to it states 'Draft saved 15:58 — nothing was sent.' Below this, the 'Audience' section shows various filters for selecting recipients, including 'Contact book', 'Player accounts', 'Both', 'Operator (by prefix)', 'Added', 'Consent', 'Stop list', 'Source', 'Player', and 'Tag'.

The second screenshot shows the 'Test send' step. The 'Send the test to' section has two radio buttons: 'My own number — +255***01' (selected) and 'Another number'. Below this, a message states 'Marketing SMS are not switched on yet — a test is refused until the owner switches them on.' The 'Swahili' and 'English' versions of the test message are displayed in separate boxes. The 'Swahili' message is '50pick: Habari Asha! Mambo makubwa yanakuja hivi karibuni, na kilichofichwa kitafichuka. Kaa nasi, hutataka kukosa!' and the 'English' message is '50pick: Hello Asha! Big things are coming soon, and what's hidden will be revealed. Stay tuned, you won't want to miss it!'. Below the messages are buttons for 'Send the Swahili test' and 'Send the English test'. At the bottom, the 'Confirm' section has a 'Confirm audience...' button and a message stating 'Confirming freezes this message and this audience. Nothing is sent until someone presses Start on the campaign's page.'

6 · Confirm and start

24 Confirm the audience

Growth → SMS campaigns → the saved draft → Confirm audience...

1. The server counts the audience now: who will receive it, who won't and why, how many SMS it uses and what it can cost.
2. A small audience (five people or fewer) is listed in the dialog; for a bigger one, type the number of people it shows.
3. Press Confirm audience. The message and the audience are frozen — a confirmed campaign can't be edited.
4. Then open the campaign to start it.

+255****83 Airtel Contact Will receive

+255****84 Airtel Contact Will receive

+255****85 Airtel Contact Will receive

Counted at 16:00:27 EAT · took 0.0 s. Every number is checked again when it is sent.

Every number is checked again at the moment its message is sent — a stop, a withdrawn consent, self-exclusion, a break, age and the account's status all refuse it then.

Test send

Send the test to

My own number — +255****01

Another number

Only a draft can be tested.

Send the Swahili test

Up to 3 tests at once, then one every 10 minutes.

Confirm

Confirm audience...

Confirmed — nothing has been sent. [Start it from its own page.](#)

25 Start it

Growth → SMS campaigns → the campaign → Start...

1. The dialog says how many people, the sending hours and the most it can cost. Press Start sending.
2. Each person is checked again just before their message: anyone who stopped, withdrew or is protected is skipped.

CONFIRM

Start sending to up to 10 people?

Each person is checked again just before their message: anyone who has stopped, withdrew or is protected is skipped. Messages go out between 08:00 and 20:00 EAT. It can cost up to TZS 60 of the TZS 10,000 limit. Keep this page open while it sends.

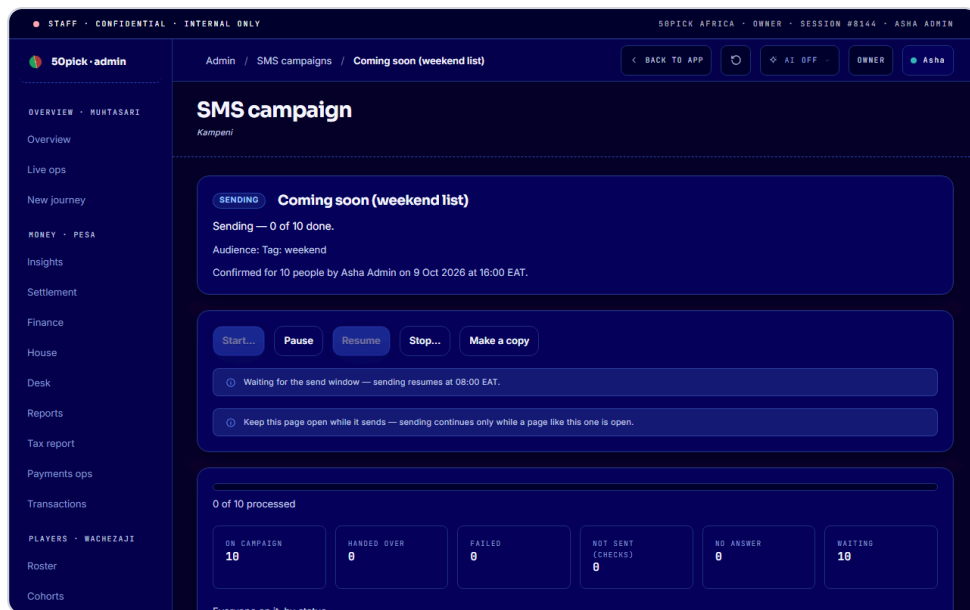

Start sending

Cancel

26 Keep the page open while it sends

Growth → SMS campaigns → the campaign

1. The page first prepares the list, then sends, and shows how many are done.
2. Sending continues only while a page like this one is open. Close it and sending waits until someone opens it again.
3. Outside the sending hours it waits, and says when it will go on.

7 · Watch, pause, resume, stop

27 Read the figures

The campaign's page

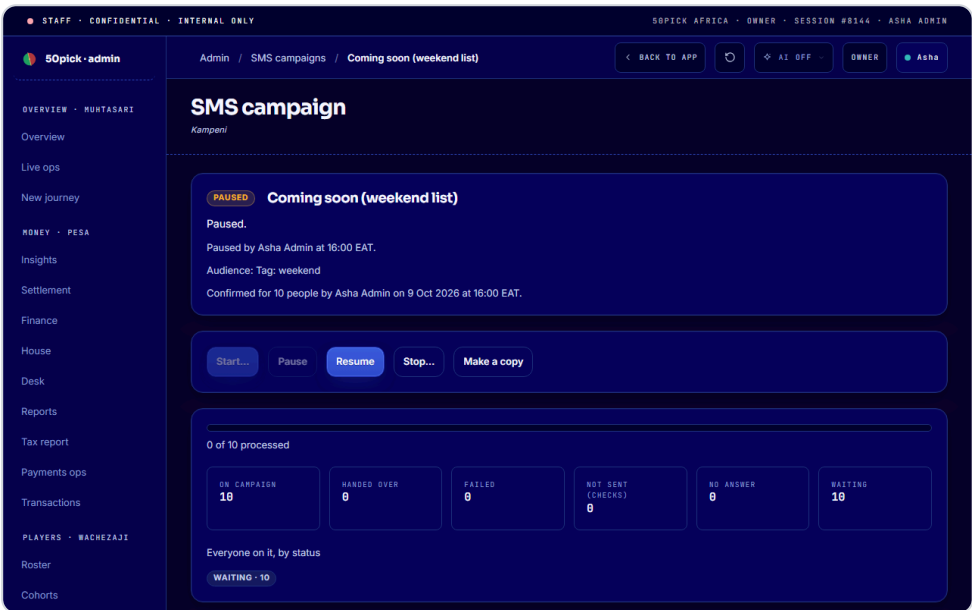

- 1. On campaign — everyone on its list. Handed over — the network took the message. Failed — did not reach the person.
- 2. Not sent (checks) — the checks stopped them, the system working. No answer — never sent again by itself. Waiting — still to go.
- 3. “Not sent, by reason” lists why people were skipped.

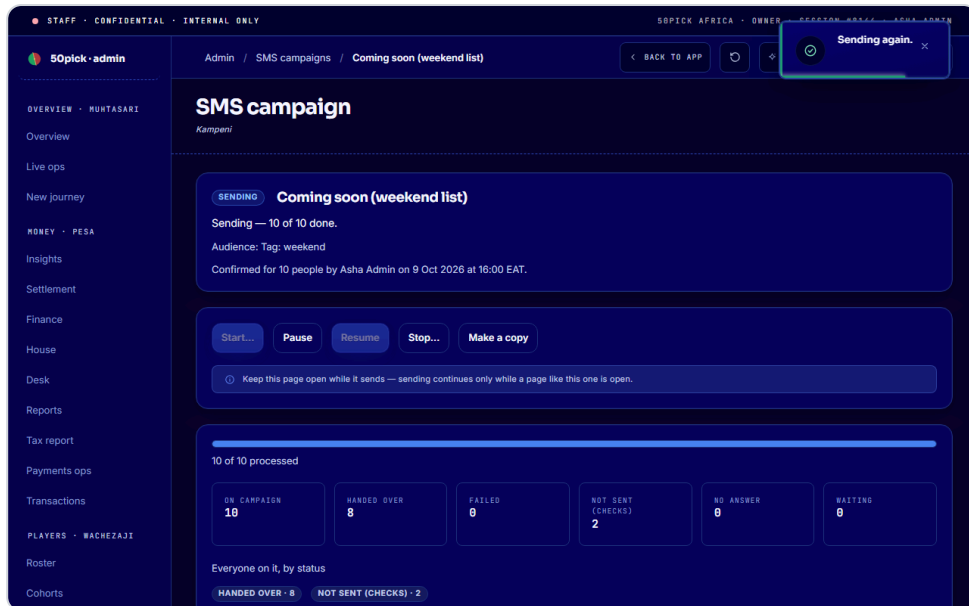

28 Pause and resume

The campaign's page → Pause, then Resume

- 1. Pause stops anything new from starting. A group already being sent may still go out.
- 2. Resume checks the switch, the SMS network and the credit for what is left, then goes on.
- 3. The page says who paused it and when.

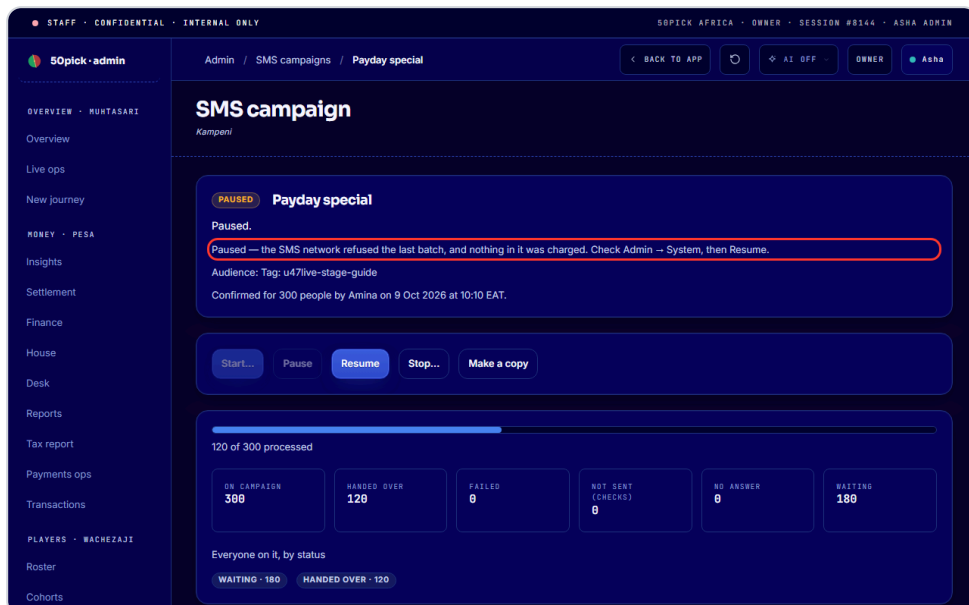

29 When the system pauses a campaign

The campaign's page

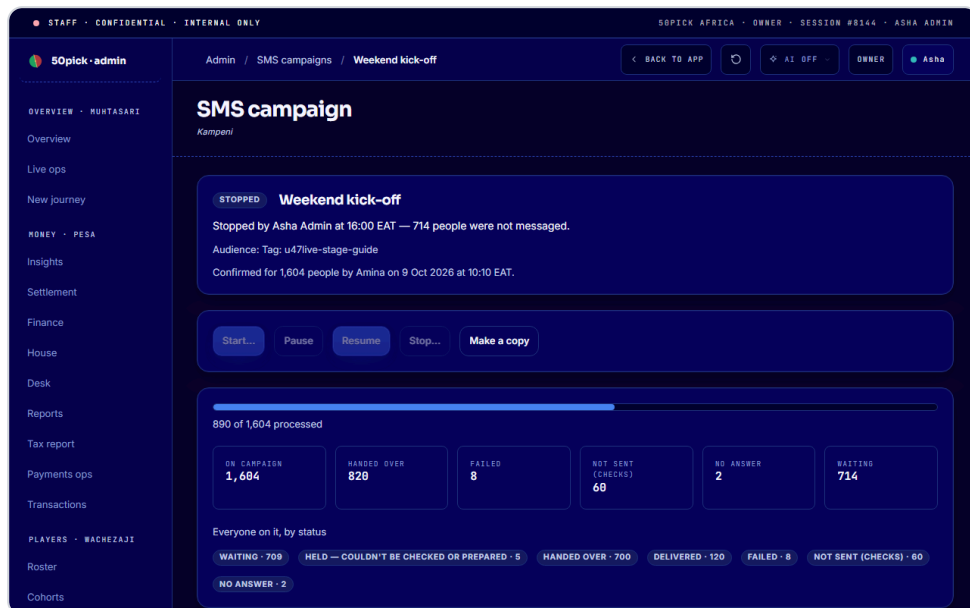

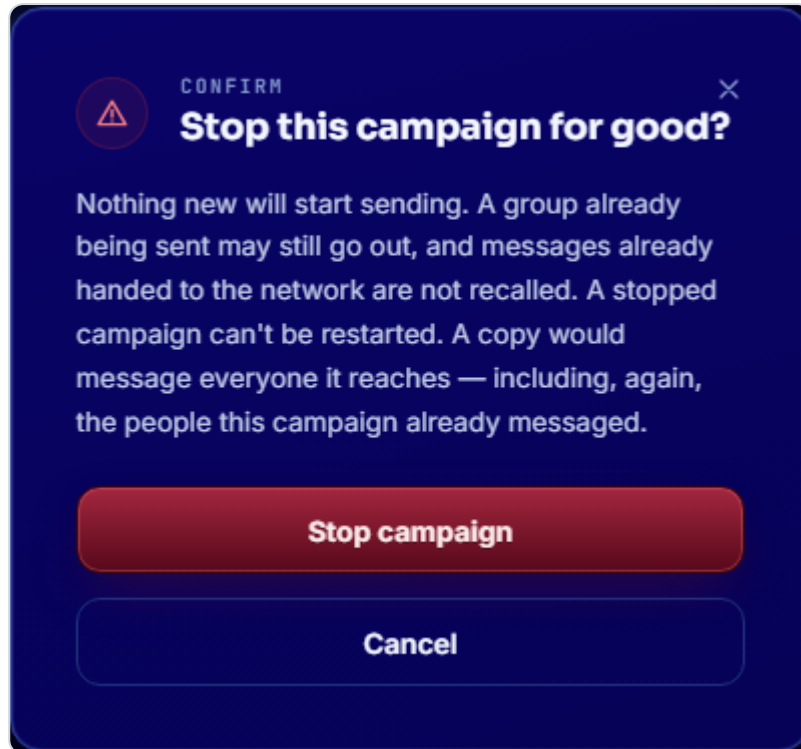

1. The page says why in plain words and what to do — for example, top up the credit, or wait for the switch.
2. Fix what it says, then press Resume.

30 Stop for good

The campaign's page → Stop...

1. A stopped campaign can't be restarted. Messages already handed to the network are not recalled.
2. Press Stop campaign in the dialog. The page says who stopped it and how many were not messaged.

31 Make a copy

The campaign's page → Make a copy

1. A copy is a new draft with the same message and audience — check and confirm it like any campaign.
2. A copy messages again anyone the first campaign already reached.

Only staff see it — it is never sent.

SWAHILI MESSAGE

50pick: Habari {jina}, ofa ya leo.

Begin with 50pick (lower case). {jina} prints the first name.

120 characters left · 1 message · GSM-7

Sent exactly as written — nothing is added to it.

{jina} keeps 12 characters for the name.

SWAHILI WORD FOR {JINA}

Rafiki

Printed when a name can't be used — letters only, at most 12.

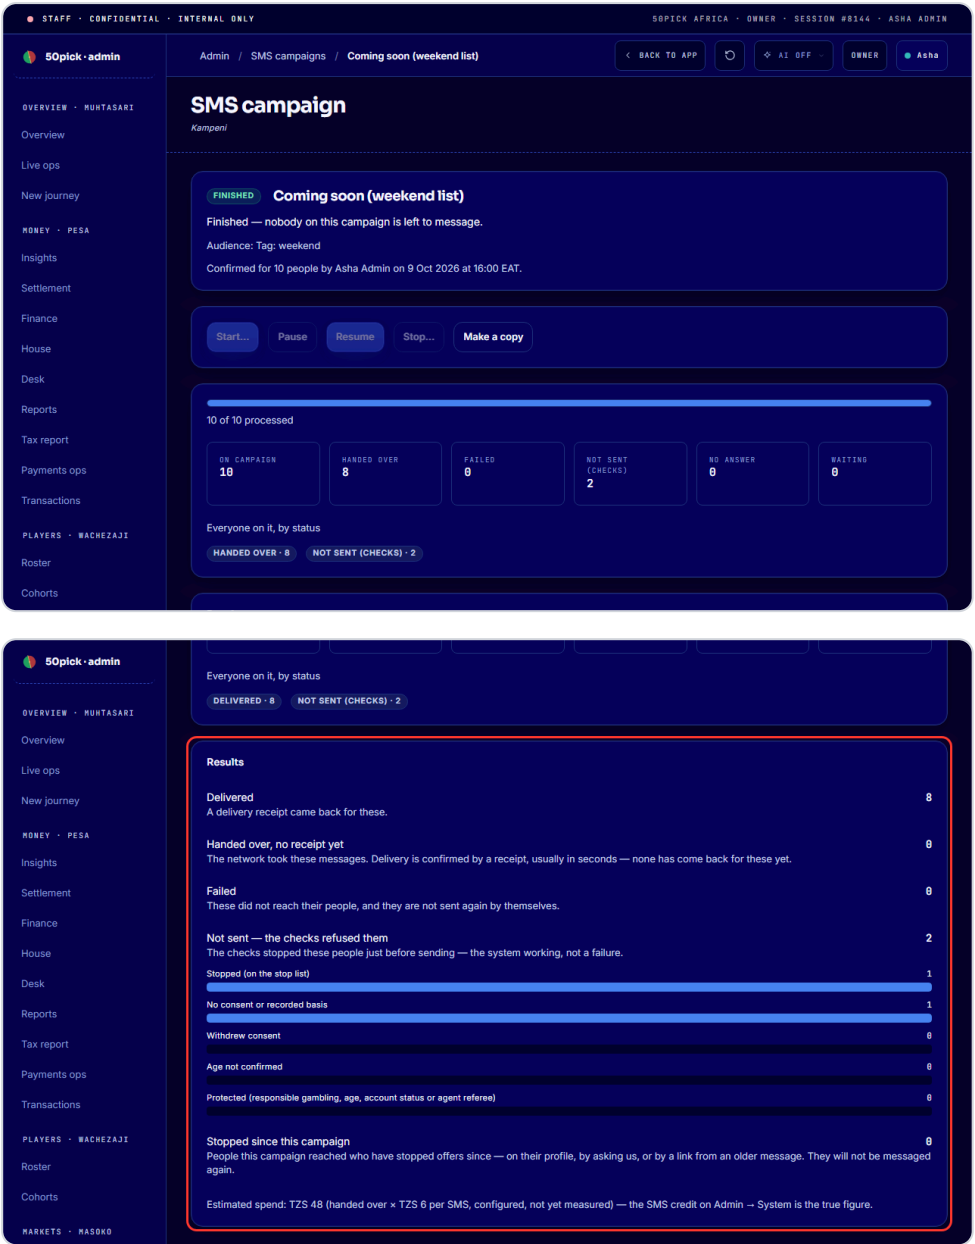

A copy was made as a new draft. Some people on this campaign have already been messaged, and the copy would message them again when it is sent.

8 • Results

32 See what happened

The campaign's page → Results

- 1. Delivered — a delivery receipt came back. Handed over, no receipt yet — the network took it; receipts usually come in seconds.
- 2. Failed, and Not sent by reason, say who did not get it and why.
- 3. Stopped since this campaign — people this campaign reached who have stopped offers since.
- 4. The estimated spend is shown to the roles that may see money; the SMS credit on System is the true figure.

9 · Your first campaigns

Do these in order before any big send.

33 Test, then a pilot, then grow

Growth → SMS campaigns

1. Send yourself the test in Swahili and in English. Read it on the phone and check the name and the words.
2. Pilot: a list of 5 to 10 staff numbers who agreed. Confirm, start, keep the page open until Finished, and check Results shows Delivered.
3. First real campaign: 100 to 200 people. Check Results and the SMS credit afterwards.
4. Then grow step by step — 1,000, then 5,000 — checking the SMS credit before each one.
5. A campaign of 1,000 people uses about 1,000 SMS, about TZS 6,000. Each campaign is held to the owner's cost limit (TZS 10,000 unless the owner changed it — about 1,600 people); for a bigger one the owner raises it first.
6. Send in the day, well inside the sending hours, and never send the same message to the same people twice — a copy messages them again.

10 · Safety

34 What protects every send

Everywhere

1. Nothing is sent while the owner's switch is off, or outside the sending hours.
2. The credit kept for login and withdrawal codes is never spent on marketing — a campaign pauses first.
3. A campaign can't cost more than its limit; Start refuses it.
4. Each person is checked just before their message: stopped, withdrawn and self-excluded people are skipped.
5. A message is sent exactly as written. Players can turn offers off under Profile → Notifications, and anyone who stopped is never messaged again.
6. Your role decides what you see and do; every action is recorded with your name and the time.
7. If anything looks wrong, press Pause, then ask.

The SMS credit tile

It shows	It means	Do this
<i>A figure such as TZS 250,000, with no colour</i>	The live balance, read just now.	Nothing — check it before a big campaign.
<i>A figure in amber, "low"</i>	The credit is below the alert level.	Ask the owner to top up soon.
<i>A figure in red, "below floor"</i>	The credit is below the floor kept for login and withdrawal codes; marketing must wait.	Ask the owner to top up now.

It shows	It means	Do this
<i>"Checking with Blackball... reload in a few seconds"</i>	The balance is being read.	Reload the page after a few seconds.
<i>"Couldn't read the balance"</i>	The SMS company did not answer this time.	Reload later. If it stays, tell the owner.
<i>A red dash with a setup note (keys, sender ID, provider)</i>	The SMS connection is not set up correctly on the server.	Tell the owner — login codes may be affected.

Messages you may see

Where	Message	It means	Do this
Contacts	<i>This number is already in the book.</i>	The number is a contact already.	Press "Open the existing contact →" and edit that one.
Contacts	<i>This number can't be added to the book.</i>	This number was erased from 50pick at the person's request.	Do not add it again.
Contacts	<i>A name can't hold a phone number — remove the number from the name.</i>	Names show to every staff role.	Take the digits out of the name.
Contacts	<i>A tag can't hold a phone number.</i>	Tags show to every staff role.	Use a word ("vip", "event-oct").
Contacts	<i>This doesn't look like an email address (name@example.com).</i>	The email is not a complete address.	Fix it, or leave it empty.
Contacts	<i>Someone changed this contact after you opened it, so nothing was saved. Reload to see the latest version, then make your change again.</i>	Two people edited the same contact.	Reload, check their change, then make yours.
Contacts	<i>Your role can view contacts but not add or change them — ask an officer with Growth access.</i>	Your role is view-only here.	Ask an officer with Growth access, or the owner.
Phone number	<i>A Tanzanian number has nine digits after +255; this one has 8. Check whether some digits were cut off.</i>	A digit or more is missing.	Check the number and type it again.
Phone number	<i>This is an international number outside Tanzania (country code +254...). 50pick sends only to Tanzanian mobile numbers.</i>	Only Tanzanian mobiles can be added.	Ask for their Tanzanian mobile number.
Many contacts	<i>The selection changed while it was being read: it now holds ... contacts, not Nothing was changed; review it again.</i>	Contacts joined or left the selection meanwhile.	Review it again — the confirmation counts afresh.
Writing	<i>The Swahili message is required — it is the one every recipient can be sent.</i>	The Swahili message is empty.	Write the Swahili message.

Where	Message	It means	Do this
Writing	<i>A campaign goes to a group, never to one phone number — take the number out of the audience. To see the message on a phone, use the test send: it goes to your own number.</i>	The audience is one phone number.	Choose a group; use the test send for one phone.
Writing	<i>The character “...” is not in the GSM alphabet, which cuts a message from 160 characters to 70. Replacing it is usually enough.</i>	A special character makes the SMS hold far fewer characters.	Press “Replace with plain characters”.
Writing	<i>This is 2 messages, and the limit is 1 — you have ... characters, and this uses</i>	The message is too long.	Shorten it until the counter fits.
Test send	<i>Marketing SMS are not switched on yet — a test is refused until the owner switches them on.</i>	Sending is off.	Ask the owner to switch marketing SMS on.
Test send	<i>Save first — the test sends the saved text.</i>	The test uses the saved message.	Press Save draft, then the test.
Confirm	<i>Nobody matches this audience yet.</i>	Nobody in this audience may receive the campaign.	Choose a wider audience.
Start	<i>Marketing SMS are switched off. The owner switches them on (Admin → System → Marketing SMS sending), then you can start. Nothing was sent.</i>	The owner's switch is off.	Ask the owner to switch them on, then Start.
Start	<i>At today's price this campaign could cost ... — more than its limit of Stop it and confirm a smaller copy, or the owner raises the limit. Nothing was sent.</i>	The campaign could cost more than its limit.	Confirm a smaller copy, or ask the owner to raise the limit.
Start	<i>Starting would leave less SMS credit than is kept for login and withdrawal codes — credit ..., this campaign up to ..., kept for codes Top up, or narrow the audience. Nothing was sent.</i>	Not enough credit for this campaign and the codes.	Ask the owner to top up, or narrow the audience.
Start	<i>The audience grew since it was confirmed — now ..., confirmed Nothing was sent. Stop this campaign and confirm a new copy.</i>	People joined the audience after it was confirmed — new contacts, for example.	Stop it and confirm a new copy.
Sending	<i>Keep this page open while it sends — sending continues only while a page like this one is open.</i>	This page is what keeps the campaign going.	Leave the page open until it says Finished.
Sending	<i>Waiting for the send window — sending resumes at 08:00 EAT.</i>	Outside the sending hours.	Nothing — it goes on by itself when the window opens.
Sending	<i>Waiting a moment — the platform is paying out or taking bets, and money always goes first. Sending resumes by itself.</i>	Money work comes first.	Nothing — it goes on by itself.
Sending	<i>Waiting — a login or withdrawal code failed in the last two minutes, so marketing steps aside. It tries again at 14:10 EAT.</i>	Login codes come first.	Nothing — it tries again by itself.

Where	Message	It means	Do this
Sending	<i>Nobody is sending this campaign right now. Open it as an officer who can send, and keep the page open.</i>	No page is open to keep it going.	Open the campaign and keep the page open.
Sending	<i>This page is out of date or lost its connection — reload it to keep sending. Nothing is lost.</i>	The page lost touch with the server.	Reload the page.
Paused	<i>Paused — the SMS credit reached what is kept for login and withdrawal codes. Top up, then Resume.</i>	The credit ran down to the part kept for codes.	Ask the owner to top up, then Resume.
Paused	<i>Paused — marketing SMS are not switched on: the owner switched them off, the time they were switched on for ran out, or the switch couldn't be read. Once Admin → System shows them on, press Resume.</i>	The switch is off.	Ask the owner to switch them on, then Resume.
Paused	<i>Paused — the SMS network refused the last batch, and nothing in it was charged. Check Admin → System, then Resume.</i>	The SMS company said no to the last group.	Check System; Resume when it is healthy.
Paused	<i>Paused — some people could not be checked or prepared. Resume to try them again, or Stop.</i>	A few people couldn't be checked.	Press Resume to try them again.
Any screen	<i>Couldn't save — your text is still here. Try again.</i>	The server did not answer this time. Nothing is lost.	Try again; if it keeps failing, reload, then tell the owner.
