

50pick admin guide

Contacts and SMS campaigns — step by step, with the page for every step

v1 · 2026-10-03 · for staff with the Admin or Growth role · <https://50pick.tz/admin>

Before you start

- These screens are for staff with the Admin or Growth role. Other roles can see the menu items they are allowed to see, or none.
- Nothing is sent to anyone from these screens yet. Writing contacts and saving campaign drafts is safe: the owner switches SMS sending on before the first real campaign.
- Every change you make is recorded with your name and the time.
- Some roles see phone numbers hidden (like +255••••78). That is on purpose: only roles allowed to read numbers see them in full.
- A contact is any phone number in the book. Every 50pick player is a contact automatically — when someone signs up, their number joins the book by itself.

1 · Signing in and finding the screens

1 Sign in to the admin console

Where: <https://50pick.tz/auth/admin>

1. Open the address above.
2. Enter your staff phone number and password, then your 2-step code if asked.
3. You land on the admin console.

If TOTP is enabled on your account you will be prompted next.

2 Find Contacts and SMS campaigns in the menu

Where: The menu on the left → Growth → Contacts, and Growth → SMS campaigns

1. On a computer the menu is on the left. On a phone, open it with the menu button at the top.
2. Under Growth you will find Contacts (the book of numbers) and SMS campaigns (the messages).

2 · The contact book

Growth → Contacts is the book of phone numbers 50pick can reach. It shows how many contacts there are, lets you search and filter, and lets you add, edit, tag and export.

3 Read the contact book

Where: Growth → Contacts

1. The tiles at the top count the book. Roles that may read numbers also see how many gave consent and how many are stopped.
2. The filters on the left (or at the top on a phone) narrow the list by operator, list or tag.
3. The search box finds a name, or a whole phone number in any spelling.
4. Each row is one contact. Tick rows to act on several at once.

4 Open Add contact

Where: Growth → Contacts → Add contact (top right, marked in red)

1. Press Add contact. The form opens over the list, with the cursor in the phone box.

5 Fill it in and save

Where: Growth → Contacts → Add contact

1. Type or paste the phone number in any spelling — 0712 345 678, +255 712 345 678 or 255712345678. The box keeps the nine digits after +255.
2. As soon as the number is complete, the form shows its network (Vodacom, Airtel, Yas, Halotel...) and checks the book.
3. Add a name, an email, notes and tags if you have them — all optional.
4. Press Save. A message confirms it and the new contact appears in the list.

The screenshot shows a modal form titled 'Add a contact' with a close button (X). The form fields are as follows:

- PHONE NUMBER:** A text input containing '+255 754 321 987'. Below it, a blue pill-shaped label says 'VODACOM'. A note reads: 'A Tanzanian mobile number, issued from Vodacom's range (M-Pesa)'.
- NAME:** A text input containing 'Neema Mushi'.
- EMAIL:** A text input containing 'neema@example.com'. A note below says: 'Optional. Stored in lower case.'
- NOTES:** A large text area for notes, currently empty. A note below says: '0 of 1,000 characters'.
- TAGS:** A text input containing 'vip, dar'. A note below says: 'Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower case.'

The screenshot shows the 'Contacts' list view in the 50pick app. The top navigation bar includes 'STAFF', 'CONFIDENTIAL', 'INTERNAL ONLY', and a user profile '50PICK AFOTCA'. The left sidebar lists various sections like 'OVERVIEW', 'MONEY', 'PLAYERS', and 'MARKETS'. The main content area is titled 'Contacts' and shows a summary of contact statistics:

- IN THE BOOK:** 46
- CONSENT GIVEN:** 18
- NO CONSENT:** 28 (with a sub-note '9 withdrawn')
- SUPPRESSED:** 4

Below the statistics is a search bar 'Q Name or full number' and a filter section with tabs for 'Any', 'Given', 'Not recorded', and 'Withdrawn'. The 'Any' tab is selected. Below the filters, there are more filter tabs for 'Any', 'Import', 'Signed up', 'Added by staff', and 'Agent'. The 'Any' tab is selected. Below these are more filter tabs for 'Any', 'dar 16', 'vip 16', 'football 8', 'arusha 7', and 'weekend 7'. The 'Any' tab is selected. The list shows '46 contacts'.

At the bottom, there is a note: 'Tick contacts to tag, list, withdraw, suppress or remove them.' and a row of buttons: 'Tag', 'Untag', 'Add to list', 'Record a withdrawal', 'Suppress', and 'Remove'.

Pasting a whole number into the phone box replaces what was there, so two numbers can never mix into one.

6 When the number is already in the book

Where: Growth → Contacts → Add contact

1. The form says the number is already in the book and offers “Open the existing contact →”.
2. Open it and edit that contact instead of adding a second one.

The screenshot shows a mobile application interface for adding a contact. The form is titled "Add a contact" and includes fields for "PHONE NUMBER", "NAME", "EMAIL", "NOTES", and "TAGS". The "PHONE NUMBER" field contains the number "+255 754 321 987". Below this field, a red error message states: "VODACOM This number is already in the book." Below the error message, a red button labeled "Open the existing contact →" is highlighted with a red circle. The "NAME" field is empty. The "EMAIL" field is empty, with a note below it: "Optional. Stored in lower case." The "NOTES" field is empty, with a note below it: "0 of 1,000 characters". The "TAGS" field is empty, with a note below it: "Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower case."

7 When the form shows a problem

Where: Growth → Contacts → Add contact (or a contact's Edit)

1. Each problem is written in red under its own field, and the first one is selected for you.
2. Fix what it says, then press Save again. Nothing is saved until every field is fine.
3. A name or a tag can't hold a phone number — the number belongs in the phone box.

The screenshot shows the same "Add a contact" form, but with multiple validation errors. The "PHONE NUMBER" field contains the number "+255 765 432 189". Below this field, a red error message states: "VODACOM A Tanzanian mobile number, issued from Vodacom's range (M-Pesa)." The "NAME" field contains the text "Juma 0712 345 678". Below this field, a red error message states: "A name can't hold a phone number — remove the number from the name." The "EMAIL" field contains the text "juma@example". Below this field, a red error message states: "Optional. Stored in lower case." The "NOTES" field is empty, with a note below it: "0 of 1,000 characters". The "TAGS" field is empty, with a note below it: "Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower case."

8 Edit a contact

Where: Growth → Contacts → the row's edit link

1. Press the edit link on the contact's row.
2. Change the name, email, notes or tags, then Save.
3. The phone number itself can't be changed — add a new number as a new contact.

The screenshot shows a modal window titled "Edit contact" with a close button (X) in the top right corner. The modal is set against a dark background with a blurred list of contacts. The form fields are as follows:

- PHONE NUMBER:** Displays "+255***87" with a "VODACOM" label and a small icon. Below it, a message states: "The number can't be changed — add a new number as a new contact."
- NAME:** A text input field containing "Neema Mushi".
- EMAIL:** A text input field containing "n****@example.com". Below it, a message states: "Leave this empty to keep the stored address, or type a new one to replace it." and a button labeled "Remove the stored address".
- NOTES:** A large text area for notes, currently empty. Below it, a character count shows "0 of 1,000 characters".
- TAGS:** A text input field containing "vip, dar". Below it, a message states: "Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower".

3 · Finding contacts

9 Search by name or by number

Where: Growth → Contacts → the search box

- 1. Type part of a name to find matching contacts.
- 2. Type a WHOLE phone number, in any spelling, to find that one contact. Part of a number never searches numbers (it keeps hidden numbers hidden).
- 3. The line above the table says what the list is showing.

10 Filter the list

Where: Growth → Contacts → the filters

1. Press an operator, a list or a tag to show only those contacts.
2. Press it again, or Clear, to show everyone.

SOURCE Any Import Signed up Added by staff Agent

TAG Any dar vip football arusha weekend

13 of 46 contacts

Showing contacts: Operator: Vodacom Clear filters

4 · Working on many contacts at once

11 Select contacts and choose an action

Where: Growth → Contacts → tick rows → the bar that appears

1. Tick the boxes on the rows you want (or “select all matching” to take every contact the filter shows).
2. The bar shows the actions: Tag, Untag, Add to list, Record a withdrawal, Suppress and Remove.

The screenshot shows the 5Opick-admin interface. On the left is a sidebar with navigation links: Overview, Live ops, New journey, MONEY - PESA, Insights, Settlement, Finance, House, Desk, Reports, Payments ops, Transactions, PLAYERS - WACHEZAJI, Roster, Cohorts, and MARKETS - MASOKO. The main content area has a header with filters: SOURCE (Any, Import, Signed up, Added by staff, Agent) and TAG (Any, dar 16, vip 16, football 8, arusha 7, weekend 7). Below the filters, it says '46 contacts'. A selection bar is visible at the top of the contact list, showing '3 selected' and a 'Clear' button. The bar contains buttons for Tag, Untag, Add to list, Record a withdrawal, Suppress, and Remove. Below the bar, a message states: 'Consent can't be recorded here: a lawful record needs a basis and an 18+ attestation, which this page doesn't take yet.' The contact list table has columns: NAME, NUMBER, OPERATOR (BY PREFIX), CONSENT, REACHABLE, and LISTS - TAGS. The first three rows are selected (checked).

	NAME	NUMBER	OPERATOR (BY PREFIX)	CONSENT	REACHABLE	LISTS - TAGS
☒	Neema Mushi	+255-***87	Vodacom	NOT RECORDED	NO CONSENT	VIP DAR
☒	Juma Hassan	+255-***36	Halotel	GIVEN	AGE NOT CONFIRMED	DAR FOOTBALL
☒	Neema Kileo	+255-***17	Airtel	WITHDRAWN	WITHDRAWN	—
☐	No name	+255-***98	Vodacom	NOT RECORDED	NO CONSENT	VIP
☐	Baraka Juma	+255-***79	Vodacom	GIVEN	AGE NOT CONFIRMED	VIP DAR +1
☐	Asha Mwakalinga	+255-***68	Yas	NOT RECORDED	NO CONSENT	—
☐	Faraja Mushi	+255-***41	Halotel	GIVEN	AGE NOT CONFIRMED	ARUSHA

12 Confirm — the server counts first

Where: Growth → Contacts → an action → the confirmation

- 1. Up to 50 ticked rows: the confirmation names them. More than 50, or any “select all matching”: type the number of contacts the server counted.
- 2. Press the action's button. A message says how many changed.

Suppress stops a number from EVER receiving marketing, and nobody can undo it — use it when a person or the Gaming Board asks 50pick to stop.

Remove deletes the contacts from the book; the records of consent and stops are kept.

13 Export the list

Where: Growth → Contacts → Export CSV (top right)

1. Filter the list first if you want only part of it.
2. Press Export CSV. The file downloads to your computer.
3. Roles that can't read numbers get a file with the numbers hidden.

5 · SMS campaigns

Growth → SMS campaigns is where messages are written and kept. Today you can write, check, save and reopen drafts. Sending starts once the owner switches SMS on.

14 See the campaigns

Where: Growth → SMS campaigns

1. Every campaign is listed with its status. A draft is a message still being written.
2. Press New SMS campaign to start one.

15 Write the message

Where: Growth → SMS campaigns → New SMS campaign

1. Give the campaign a name (only staff see it).
2. Write the Swahili message — it is required, because every recipient can receive it. It must start with “50pick”.
3. English is optional: players whose account language is English get it; everyone else gets Swahili.
4. A campaign message must fit in ONE SMS. The counter under each message shows the room left before the footer; the stop link is added for you and counted.

SWAHILI MESSAGE

50pick: Karibu! Bashiri mechi za wikendi hii na ushinde.

Begin with 50pick (lower case). {jina} prints the first name.
24 characters left · 1 message · GSM-7
Includes the stop link, which is required and is counted.
31 characters are kept for the source line a contact-book number needs — its wording is not set yet.

ENGLISH MESSAGE (OPTIONAL)

16 Fix what the composer marks

Where: Growth → SMS campaigns → the message

1. A character outside the plain SMS alphabet (a curly quote, an emoji) turns the message into Unicode, which fits far fewer characters. The composer names the character; press “Replace with plain characters” or retype it.
2. Too long for one SMS? The composer says how many characters you have before the required footer.

SWAHILI MESSAGE

50pick: Karibu! Bashiri mechi za wikendi hii na ushinde “leo”.

Unicode leaves no room once the required footer is added — replace: “ (curly opening double quote), ” (curly closing double quote).

Unicode leaves no room · 3 messages · the limit is 1

Forced to Unicode by: “ (curly opening double quote), ” (curly closing double quote)

Replace with plain characters

Includes the stop link, which is required and is counted.

31 characters are kept for the source line a contact-book number needs — its wording is not set yet.

ENGLISH MESSAGE (OPTIONAL)

17 Choose who it is for

Where: Growth → SMS campaigns → Audience

1. The audience is the contact book, or the part of it a filter on the Contacts page chose.
2. A campaign always goes to a group — never to one phone number.

The screenshot shows the 50pick admin interface. On the left is a sidebar with navigation links: Overview, Live ops, New journey, MONEY - PESA (Insights, Settlement, Finance, House, Desk, Reports, Payments ops, Transactions), PLAYERS - WACHEZAJI (Roster, Cohorts), MARKETS - MASOKO (Event calendar), and HUNTASARI. The main content area is titled 'Choose who it is for' and contains three sections: 'ENGLISH MESSAGE (OPTIONAL)' with a text input field and a 'Save draft' button; 'Audience' with the text 'Everyone in the contact book — no filter.' and 'Nothing is counted or sent from this page. Who will receive it — after consent, stops and age — is counted and confirmed before any campaign starts.'; and 'Test send' with a 'To' field set to '+255****01 (your own number)', a note about marketing SMS, a 'Save first' button, and a 'Send the Swahili test' button. A red box highlights the 'Audience' section.

18 Save the draft

Where: Growth → SMS campaigns → New SMS campaign → Save draft

1. Press Save draft. The line beside it says when it was saved — and that nothing was sent.

This screenshot shows the same 50pick admin interface as the previous one, but after the 'Save draft' button has been clicked. The 'Save draft' button is now highlighted with a red box, and next to it is a confirmation message: 'Draft saved 20:09 — nothing was sent', also highlighted with a red box. The 'Test send' section now displays a preview of the Swahili message: '50pick: Karibu! Bashiri mchi za wikendi hii na ushinde. 50pick 18+ 0800110011 Acha: 50pick.tz/s/xxxxxxx'. Below this, it states: 'Your stop link is made the first time you send a test; until then it shows as xxxxxxxx.'

19 Open a draft again

Where: Growth → SMS campaigns → the draft's name in the list

- 1. Every saved draft is in the list. Press its name to open it again, exactly as you left it.

20 The test send

Where: Growth → SMS campaigns → a saved draft → Test send

1. The test sends the saved message to a phone so you can see it as a recipient will.
2. Until the owner switches SMS sending on, the test says so and sends nothing.

The screenshot shows the 50pick admin interface. On the left is a sidebar with navigation links: OVERVIEW · HUNTASARI, Overview, Live ops, New Journey, MONEY · PESA, Insights, Settlement, Finance, House, Desk, Reports, Payments ops, Transactions, PLAYERS · WACHEZAJI, Roster, Cohorts, MARKETS · MASOKO, and Event calendar. The main content area is titled '50pick - admin' and contains three sections: 1. A top section with a dark header, stating 'No English text — everyone gets the Swahili message.' and 'Sender 50pick — set on the server; it can't be changed here.' It includes a 'Save draft' button and a status message 'Draft saved 20:09 — nothing was sent.' 2. An 'Audience' section stating 'Everyone in the contact book — no filter.' and 'Nothing is counted or sent from this page. Who will receive it — after consent, stops and age — is counted and confirmed before any campaign starts.' 3. A 'Test send' section, highlighted with a red border, containing: 'To +255****01 (your own number)', 'Marketing SMS are not switched on yet — a test is refused until the owner switches them on.', 'Swahili, as it will be sent to you', a text box with the message '50pick: Karibu! Bashiri mechi za wikendi hii na ushinde. 50pick 18+ 0800110011 Acha: 50pick.tz/s/xxxxxxx', 'Your stop link is made the first time you send a test; until then it shows as xxxxxxxx.', a 'Send the Swahili test' button, and 'Up to 3 tests at once, then one every 10 minutes.'

Coming next: the test will take any number you type, not only your own.

6 • The SMS balance

21 See how much SMS credit is left

Where: The menu → System → the “SMS credit” tile at the top

- 1. The tile shows the credit left with the SMS company, in TZS, read live.
- 2. Each SMS costs about TZS 6. Login and withdrawal codes use the same credit, so never let it run out.
- 3. The table below explains every state the tile can show.

This screenshot comes from a test server, which has no real credit. On 50pick.tz the tile shows the live balance.

7 · On a phone

22 The same screens on a phone

Where: Any of the screens above, on a phone's browser

- 1. Everything works on a phone: the filters move to the top, and the menu opens from the top bar.

The SMS balance — what the tile can show

The tile shows	What it means	What to do
A figure such as TZS 250,000, with no colour	The live balance, read just now.	Nothing — keep an eye on it before a big campaign.
A figure in amber, "low"	The credit is below the alert level.	Ask the owner to top up soon.
A figure in red, "below floor"	The credit is below the floor kept for login and withdrawal codes; marketing must wait.	Ask the owner to top up now.
"Checking with Blackball... reload in a few seconds"	The balance is being read.	Reload the page after a few seconds.

The tile shows	What it means	What to do
<i>"Couldn't read the balance"</i>	The SMS company did not answer this time.	Reload later. If it stays, tell the owner.
<i>A red dash with a setup note (keys, sender ID, provider)</i>	The SMS connection is not set up correctly on the server.	Tell the owner — this is a technical setting, and login codes may be affected.

Messages you may see

Every message below is copied from the platform as it is today. Find the message, then do what the last column says.

Where	Message	What it means	What to do
Add / edit contact	<i>This number is already in the book.</i>	The number is a contact already.	Press "Open the existing contact →" and edit that one.
Add / edit contact	<i>This number can't be added to the book.</i>	This number was erased from 50pick at the person's request.	Do not add it again.
Add / edit contact	<i>A name can't hold a phone number — remove the number from the name.</i>	Names show to every staff role, while numbers are hidden for some.	Remove the digits from the name; the number goes in the phone box.
Add / edit contact	<i>A tag can't hold a phone number.</i>	Tags show to every staff role.	Use a word, not a number (e.g. "vip", "event-oct").
Add / edit contact	<i>A tag can hold only letters, digits, spaces, - and _.</i>	The tag has a character tags can't hold.	Remove the character.
Add / edit contact	<i>This doesn't look like an email address (name@example.com).</i>	The email is not a complete address.	Fix it, or leave the email empty.
Add / edit contact	<i>A name can be at most 120 characters.</i>	The name is too long.	Shorten it.
Add / edit contact	<i>Notes can be at most 1000 characters.</i>	The notes are too long.	Shorten them.
Add / edit contact	<i>Someone changed this contact after you opened it, so nothing was saved. Reload to see the latest version, then make your change again.</i>	Two people edited the same contact.	Reload, check their change, then make yours.
Add / edit contact	<i>Your role can view contacts but not add or change them.</i>	Your role is view-only here.	Ask an officer with Growth access, or the owner.
Phone number	<i>A Tanzanian number has nine digits after +255; this one has 8. Check whether some digits were cut off.</i>	A digit or more is missing.	Check the number with the person and type it again.

Where	Message	What it means	What to do
Phone number	<i>This is an international number outside Tanzania (country code +254...). 50pick sends only to Tanzanian mobile numbers.</i>	Only Tanzanian mobiles can be added.	Ask for their Tanzanian mobile number.
Bulk actions	<i>Type one tag at a time — a comma, ; or separates tags.</i>	The bulk Tag box takes one tag.	Type a single tag.
Bulk actions	<i>A list name can't hold a phone number — remove the number from the name.</i>	List names show to every staff role.	Name the list with words.
SMS campaign	<i>Give the campaign a name — only staff see it.</i>	The name is empty.	Type a name.
SMS campaign	<i>The Swahili message is required — it is the one every recipient can be sent.</i>	The Swahili message is empty.	Write the Swahili message.
SMS campaign	<i>A campaign name can't hold a phone number — the digits ending 78 read as one, and campaigns are kept for good.</i>	Campaigns are never deleted, so a number in a name would be kept for ever.	Name the group it is for; write other figures with a comma or a slash.
SMS campaign	<i>A campaign goes to a group, never to one phone number — take the number out of the audience. To see the message on a phone, use the test send: it goes to your own number.</i>	The audience is one phone number.	Choose a group (a filter); use the test send for one phone.
SMS campaign	<i>The character "... " is not in the GSM alphabet, which cuts a message from 160 characters to 70. Replacing it is usually enough.</i>	A special character (curly quote, emoji...) makes the SMS hold far fewer characters.	Press "Replace with plain characters", or retype it.
SMS campaign	<i>This is 2 messages, and the limit is 1 — you have ... characters before the required footer, and this uses</i>	The message is too long.	Shorten it until the counter is within the limit.
SMS campaign	<i>Nothing to save — no changes since the last save.</i>	The draft is already saved as it is.	Nothing — your draft is safe.
SMS campaign	<i>Couldn't save — your text is still here. Try again.</i>	The save did not reach the server.	Press Try again; your text is not lost.
SMS campaign	<i>This campaign is no longer a draft — its message can't change.</i>	The campaign moved on from draft.	Start a new campaign for a new message.
SMS campaign	<i>Your role can't write or test SMS campaigns — ask an officer with growth access.</i>	Your role can't use the composer.	Ask an officer with Growth access, or the owner.
Test send	<i>Marketing SMS are not switched on yet. The owner switches them on before the first send.</i>	Sending is still off for everyone.	Nothing — the owner switches it on before the first campaign.
Test send	<i>Save first — the test sends the saved text.</i>	The test uses the saved version of the message.	Press Save draft, then the test.
