How to use 50pick.

A short, screenshot-led walk-through of every screen you'll touch as a player — sign up, place a bet, see your wallet, take a break when you need to. Bilingual notes (Swahili in italics) where it helps.

STEP 1 · SIGN UP

Create your account

You need a Tanzanian phone number, a password, and to be 18 or older. The whole sign-up takes under a minute.

SIGN-UP SCREEN · OPEN 50PICK.TZ AND TAP "CREATE ACCOUNT".

1

Enter your phone number

Type only digits — the input strips letters or spaces automatically and shows the number formatted as *712 345 678*. The "+255" prefix is added for you.

Andika tarakimu tu — alama nyingine zinaondolewa moja kwa moja.

2

Pick a strong password

At least 8 characters. The strength meter under the field tells you when it's **Strong · Imara**. Avoid common passwords like "password" or "12345678" — the platform refuses them.

3

Confirm age & terms

Tick the two boxes — you must be 18 or older and you accept the **Terms** and **Privacy** notice. The optional third box opts you in to product updates.

STEP 2 • BROWSE MARKETS

Find a question to predict

Markets are real-world questions with a **YES** or **NO** answer — football, weather, macro, crypto, culture. The bar on each card shows where the pool is leaning right now.

MARKETS · TAP ANY CARD TO SEE THE FULL QUESTION AND PLACE A BET.

1 Filter by category

Use the chips at the top — All, Sports, Macro, Weather, Crypto, Culture — to narrow down.

2

Read the bar

Green is YES, red is NO. The percentages tell you where the crowd has put their money. A market near 50/50 is "tipping" — the most contested.

3

Tap to open

Tap any card to see the full question, the resolution source, the live pool, and the bet panel.

MARKET DETAIL · DRAG THE DIAL TOWARD YES (RIGHT) OR NO (LEFT). THE PROJECTED PAYOUT UPDATES LIVE.

1

Drag the dial

Slide right for **YES**, left for **NO**. The further you push, the bigger your stake. A small dot in the centre means "no bet yet."

2

Read the projection

The screen shows your stake, the projected payout if you're right, and the operator margin (the same nine percent on every market).

3

Confirm

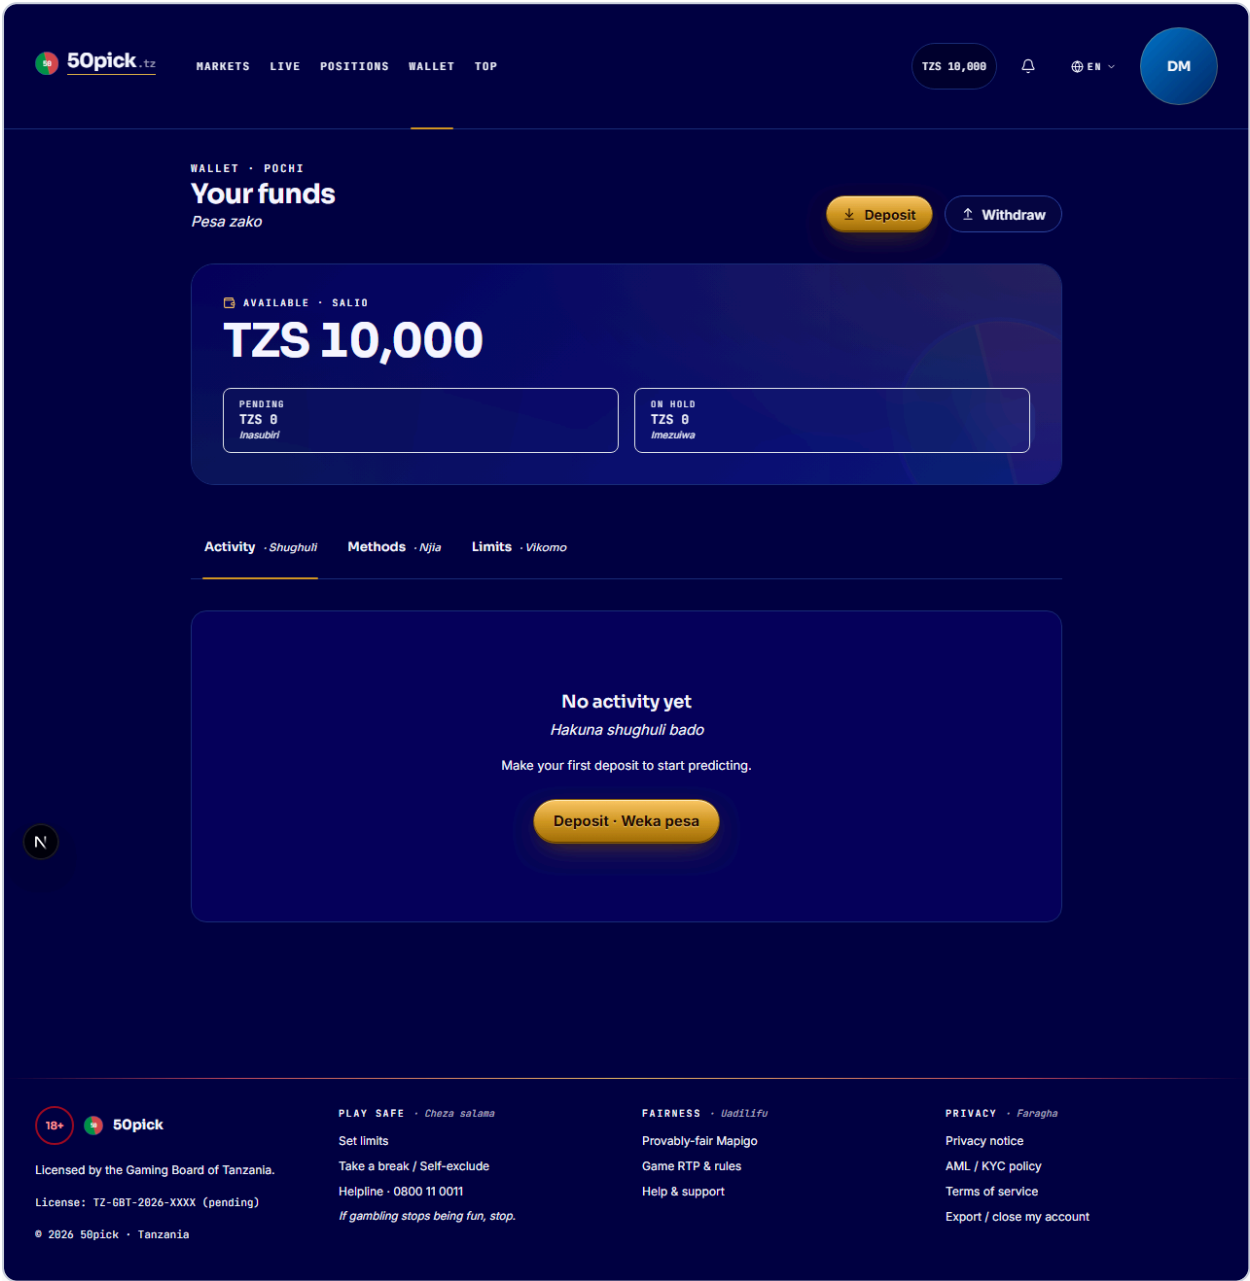

Tap **Place bet**. A confirmation pops up with a five-second locked-in price. Tap **Confirm** to submit. You'll get an inbox notification right away with the receipt.

Quote-hold. The five-second timer means the price you see at confirmation is the price you get — no slippage, no surprise. If you wait too long, the modal closes and you can re-aim.

STEP 4 · WALLET & POSITIONS

Track your money

Your wallet shows your balance, deposit and withdrawal history. The top-bar pill (TZS pill next to your avatar) is the same number — tap it any time.

WALLET · DEPOSIT, WITHDRAW, HISTORY, AND THE AML NOTICE WHEN LIMITS APPLY.

Open bets live on the **Positions** screen. Each card shows the market, your side (YES or NO), the stake, and the projected payout if you win.

If gambling stops being fun, stop.

The **Responsible gambling** screen lets you set deposit limits (daily, weekly, monthly), session limits, take a break (1 hour, 24 hours, 1 week), or self-exclude (24 hours through permanent). Self-exclusion cannot be reversed by you until the period ends — that's the whole point.
