

50pick admin guide

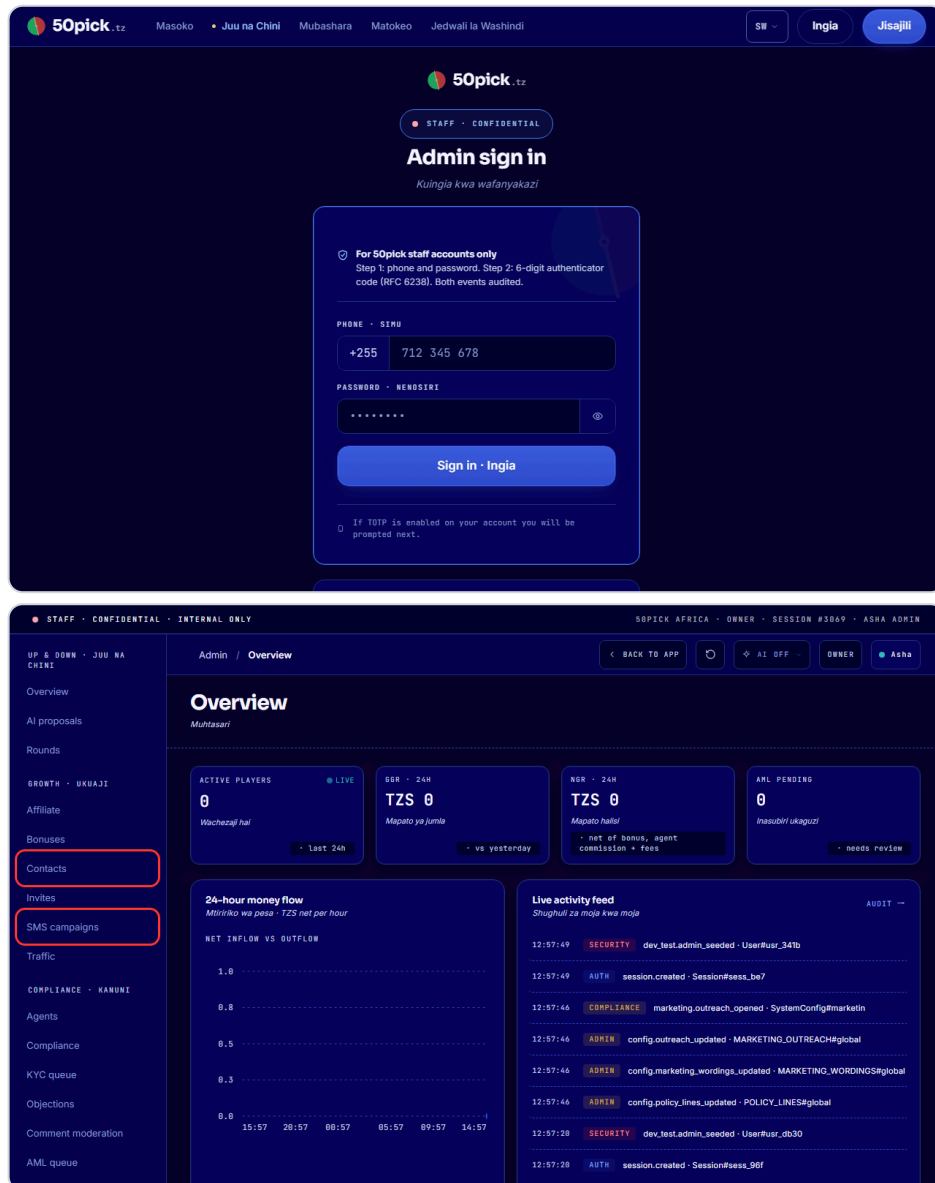

Contacts and SMS campaigns, step by step

9 October 2026

1 Sign in

<https://50pick.tz/auth/admin>

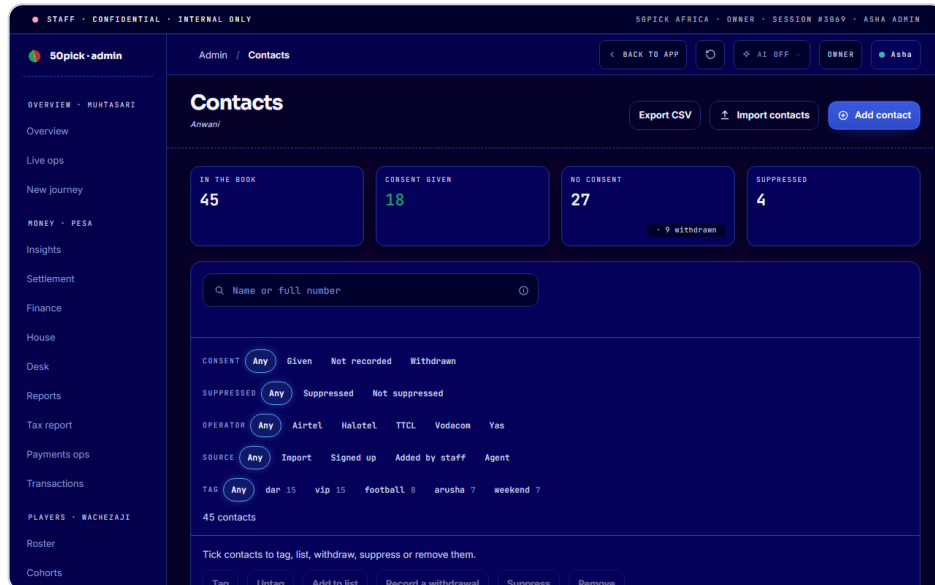

1. Enter your staff phone number and password, then press Sign in.
2. Contacts and SMS campaigns are in the menu, under Growth.

2 The contact book

Growth → Contacts

1. The tiles at the top count the book; the filters and the search box narrow the list. For a role that can't see phone numbers, a whole number answers only whether it is in the book.
2. Each row is one contact. Tick rows to act on several at once.

2.1 Add a contact

Growth → Contacts → Add contact

1. Type or paste the number in any format — 0712 345 678, +255 712 345 678 or 255712345678. The form shows the network as soon as the number is complete.
2. If the number is already in the book, the form says so. If it offers “Open the existing contact —”, press it and edit that contact; if it doesn't, there is no contact you can open for that number — leave it, it can't be added again. The book never holds a number twice.
3. Name, email, notes and tags are optional. Press Save contact.

CONTACTS · ANWANI

Add a contact

PHONE NUMBER

+255 754 321 987

VODACOM

A Tanzanian mobile number, issued from Vodacom's range (M-Pesa).

NAME (OPTIONAL)

Neema Mushi

11 of 120 characters

EMAIL (OPTIONAL)

neema@example.com

Stored in lower case.

NOTES (OPTIONAL)

0 of 1,000 characters

TAGS (OPTIONAL)

vip, dar

Separate tags with a comma, ; or |. Letters, digits, spaces, - and _ only, up to 32 characters each and 20 per contact. Stored in lower case.

2 of 20 tags

CONSENT

NOT RECORDED

This form never records consent. A contact is messaged only with their own recorded consent or through a list whose licence basis is recorded — and never after a stop.

Cancel Save contact

2.2 Fix what the form marks

Growth → Contacts → Add contact, or a contact's Edit

1. A problem is written in red under its box, and Save contact stays off until it is fixed.
2. A name or a tag can't hold a phone number — the number belongs in the phone box.

CONTACTS · ANWANI
Add a contact

PHONE NUMBER
+255 765 432 189

VODACOM
A Tanzanian mobile number, issued from Vodacom's range (M-Pesa).

2.4 Find contacts

Growth → Contacts

1. Type part of a name, or a whole phone number in any format, in the search box.
2. For a role that can't see phone numbers, a whole number shows no rows — only “This number is in the book.” or “This number is not in the book.” To record a stop or a withdrawal for a number in the book, press “Select this number”, then choose Suppress or Record a withdrawal — the only two actions that act on it. A role that can see phone numbers gets the same “Select this number” when the book holds the number but has no contact to show for it.
3. Press an operator, a list or a tag to show only those contacts. Clear filters shows everyone again.

2.5 Tag, list, suppress or remove contacts

Growth → Contacts → tick rows

1. Tick the rows — one or many. To take every contact the filters show, tick the whole page, then press “Select all ... matching”.
2. Choose Tag, Untag, Add to list, Record a withdrawal, Suppress or Remove.
3. Tag and Add to list are refused over a Consent, Suppressed, Source or Player filter, for every role — a tag or a list made from it would show staff who may not use that filter who is in it. Tick those contacts by hand instead.
4. For up to 50 ticked contacts the confirmation names each one; for more, type the number it shows. Then press the action's button.

The screenshot shows the 50pick-admin interface. On the left is a sidebar with navigation links: OVERVIEW · NUNTASARI, Live ops, New journey, MONEY · PESA, Insights, Settlement, Finance, House, Desk, Reports, Tax report, Payments ops, Transactions, PLAYERS · WACHEZAJI, Roster, Cohorts, and MARKETS · NASDKO. The main area displays a table of contacts with filters at the top: SOURCE (Any), Import, Signed up, Added by staff, Agent; TAG (Any), dar 16, vip 16, football 8, arusha 7, weekend 7. Below the filters, it says '46 contacts'. A red box highlights the action bar for 3 selected contacts, which includes buttons for Tag, Untag, Add to list, Record a withdrawal, Suppress, and Remove, along with a Clear button. Below the action bar, a message states: 'Consent isn't recorded in bulk. A contact who isn't a player is reached through a list — its basis and 18+ confirmation are recorded on the Lists card below.' The table lists contacts with columns for NAME, NUMBER, OPERATOR (BY PREFIX), CONSENT, WILL RECEIVE, and LISTS · TAGS. The contacts shown are Neema Mushi, Juma Hassan, Neema Kileo, No name, Baraka Juma, Asha Mwakalinga, and Faraja Mushi. A confirmation dialog is open in the foreground, titled 'CONTACTS · ARUBANT' and 'Tag 3 contacts with "event-oct"?'. It explains that each contact gets the tag once and that a contact with 20 tags is left as is. It lists the 3 selected contacts: Juma Hassan (+255-000-36), Neema Kileo (+255-000-17), and Neema Mushi (+255-000-87). The dialog has 'Tag 3' and 'Cancel' buttons.

NAME	NUMBER	OPERATOR (BY PREFIX)	CONSENT	WILL RECEIVE	LISTS · TAGS
Neema Mushi	+255-000-87	Vodacom	NOT RECORDED	NO RECORDED BASIS	VIP DAR
Juma Hassan	+255-000-36	Halotel	GIVEN	NO RECORDED BASIS	DAR FOOTBALL
Neema Kileo	+255-000-17	Airtel	WITHDRAWN	WITHDRAWN	—
No name	+255-000-98	Vodacom	NOT RECORDED	NO RECORDED BASIS	VIP
Baraka Juma	+255-000-79	Vodacom	GIVEN	NO RECORDED BASIS	VIP DAR +1
Asha Mwakalinga	+255-000-68	Yas	NOT RECORDED	NO RECORDED BASIS	—
Faraja Mushi	+255-000-41	Halotel	GIVEN	NO RECORDED BASIS	ARUSHA

Suppress stops a number from ever receiving marketing, and it can't be undone — use it when a person asks 50pick to stop. A role that can't see phone numbers can still record a stop or a withdrawal for a number it searched: “Select this number”, then Suppress or Record a withdrawal — the confirmation counts it without naming anyone.

Remove deletes contacts from the book; the records of their consent and stops are kept.

2.6 Export the book

Growth → Contacts → Export CSV

1. Filter first if you want only part of the book, then press Export CSV. Roles that can't see phone numbers get them hidden.

3 Import contacts from a file

3.1 How much to import each time

1. First, a test file of 20 to 50 contacts. Check the result, and open a few of the contacts in the book.
2. Then files of up to 5,000 rows, one import at a time, checking each result before the next. Once you trust your files, bigger ones are fine — one import takes up to 200,000 rows.
3. Before each import, press Export CSV, so you keep a copy of the book as it was.
4. Never import while a campaign is being confirmed or started — new people in its audience stop it from starting.

3.2 Choose the file

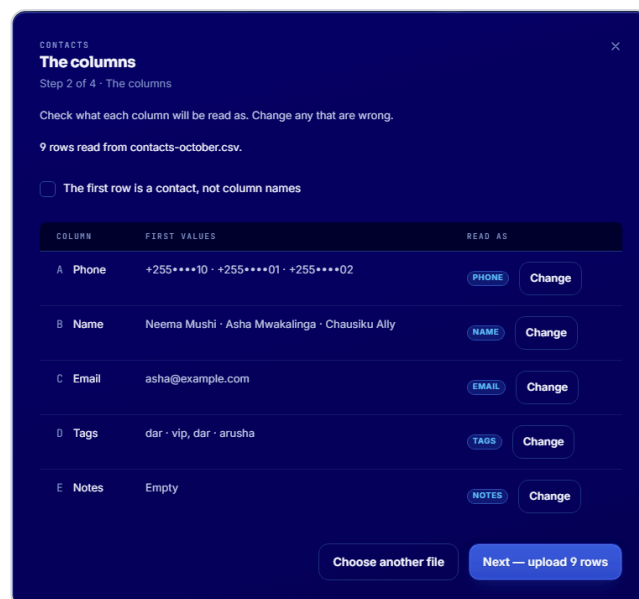

Growth → Contacts → Import contacts

1. Drop or choose an Excel file (.xlsx), a CSV, or a phone's contacts file (.vcf) — or press Paste instead and paste cells from Excel or a chat.
2. No file-size limit for Excel, CSV or a phone's contacts file — up to 200,000 rows in one import.
3. Old Excel files (.xls), OpenDocument (.ods), Apple Numbers, PDFs and pictures can't be read — save the list as .xlsx or CSV first.
4. If the window closes or the page reloads, press Import contacts again: an unfinished import carries on from where it stopped.

3.3 Check the columns

Import contacts → The columns

1. Each column shows its first values and what it will be read as — Phone, Name, Email, Tags, Notes or Not used. Press Change on any that is wrong.
2. A file that starts with a contact instead of column names is recognised; make sure the phone column is the right one.
3. Press Next. The rows are uploaded — nothing is in the contact book yet.

CONTACTS

The columns

Step 2 of 4 · The columns

Check what each column will be read as. Change any that are wrong.

9 rows read from contacts-october.csv.

☐ The first row is a contact, not column names

Column	First values	Read as
A Phone	+255****10 · +255****01 · +255****02	PHONE Change
B Name	Neema Mushi · Asha Mwakalinga · Chausiku Ally	NAME Change
C Email	asha@example.com	EMAIL Change
D Tags	dar · vip, dar · arusha	TAGS Change
E Notes	Empty	NOTES Change

[Choose another file](#) [Next — upload 9 rows](#)

3.4 Read the check

Import contacts → Check before importing

1. Five boxes add up to your file: New to the book, Already in the book, Repeated in this file, Can't be imported as written, Could not be read.
2. A number repeated in the file is imported once — its first row. Each problem row is listed with its row number in your file and the reason.
3. Nothing has been written to the book yet. If many rows can't be used, fix the file and start again.

The check

NEW TO THE BOOK	ALREADY IN THE BOOK	REPEATED IN THIS FILE	CAN'T BE IMPORTED AS WRITTEN	COULD NOT BE READ
2	4	1	2	0

2 + 4 + 1 + 2 + 0 = 9 rows — every row of your file is counted once.

Nothing has been written to the book yet.

When a number appears more than once, the first row is the one imported; the later rows are kept as they are.

CAN'T BE IMPORTED AS WRITTEN Showing 2 of 2

Row	Reason
Row 8	This row has no phone number in it. Ask for their mobile number.
Row 9	A Tanzanian number has nine digits after +255; this one has 2. Check whether some digits were cut off.

REPEATED IN THIS FILE Showing 1 of 1

Row	Reason
Row 7 repeats row 2	+255***18

NUMBERS ALREADY IN THE BOOK

4 numbers in your file are already in the contact book. Choose what happens to them.

☒ **Keep what's in the book (recommended)**
Nothing about these contacts changes. New numbers are still added.
No contact changes

☐ **Use the file's version**
The file's name, email and notes replace what the book holds. Tags are added, never removed.
1 contact changes

☐ **Only fill in what's missing**
Only details the book doesn't have yet are filled in from the file.
1 contact changes

A blank cell never erases anything. Numbers on the stop list and erased people are never changed.

WHAT WOULD CHANGE Showing 1 of 1

Each contact below differs from your file. Set one apart from the choice above if it should be treated differently.

ROW	CONTACT	WITH THIS CHOICE	SET APART
Row 3	+255***01 Asha	Stays as it is	☐ Use the file's version for this contact

ADD THE CONTACTS TO A LIST

Offers reach people through a list whose basis and 18+ confirmation are recorded on the Lists card.

☒ **Don't add them to a list**
The contacts go into the book only.

☐ **A new list**

This import: 2 new • 0 updated • 5 kept as they are.

[Discard this import](#) [Import 7 rows](#)

3.5 Choose what happens to numbers already in the book

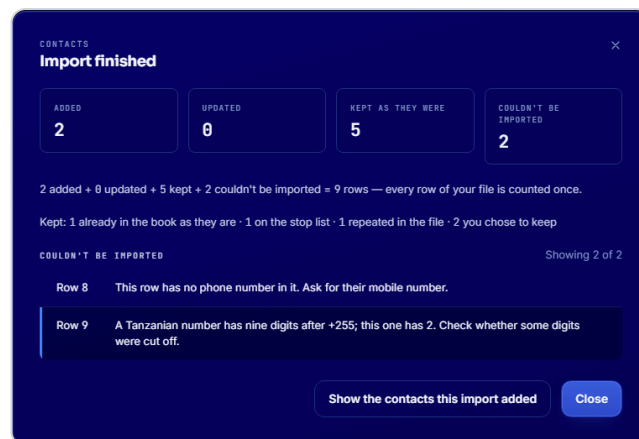

Check before importing → Numbers already in the book

1. Keep what's in the book (recommended) — those contacts don't change; new numbers are still added.
2. Use the file's version — the file's name, email and notes replace the book's; tags are only added. You confirm it, and there is no undo.
3. Only fill in what's missing — only details the book doesn't have yet are filled in.
4. A blank cell never erases anything, and numbers on the stop list and erased people are never changed. Only a role that can see phone numbers can update contacts already in the book.
5. To send these people offers, add them to a list here; a list is ready for offers once its licence basis and 18+ confirmation are recorded on the Lists card.
6. If you can't see phone numbers — or you start an import uploaded by someone who can't — only the contacts the import adds join the list; numbers already in the book stay as they are, and the panel says so.

3.6 Import, and read the result

Check before importing → Import

1. The line above the button says what will happen — for example “This import: 2 new · 0 updated · 5 kept as they are.” Then press Import.
2. A bar counts the rows as they are written. You can stop and resume; if the window closes, press Import contacts again and it carries on.
3. The result counts Added, Updated, Kept as they were and Couldn't be imported — each failure with its row and the reason.

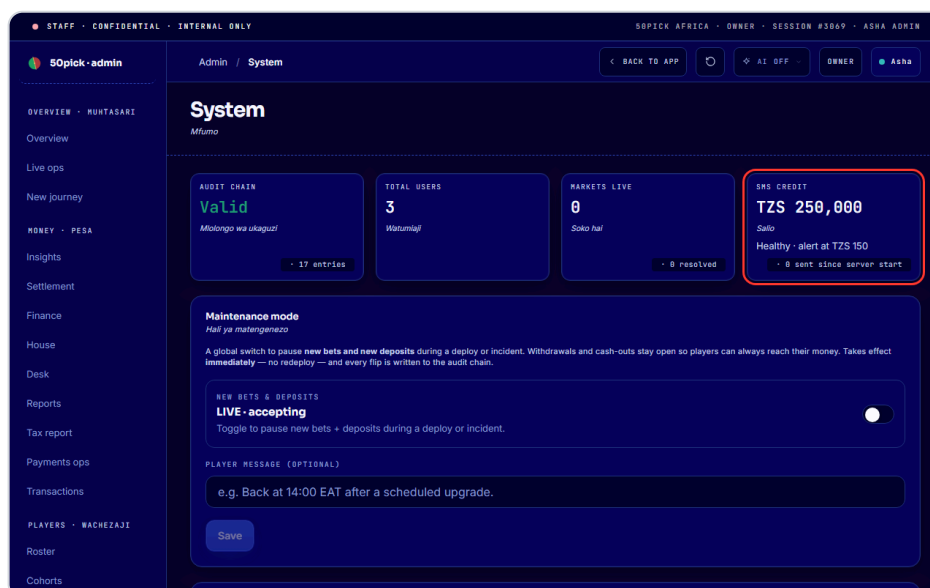

4 Before anything is sent

4.1 Check the SMS credit

System → the “SMS credit” tile

1. The tile shows the credit left with the SMS company, read live. Each SMS costs about TZS 6.
2. Login and withdrawal codes use the same credit. Part of it is kept for them, and a campaign pauses rather than spend it.

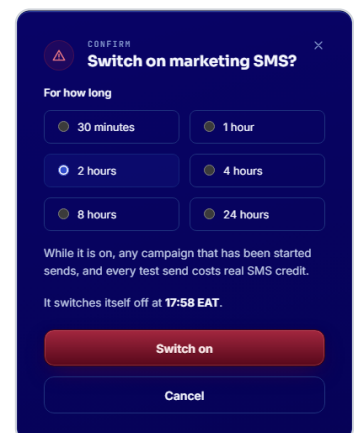

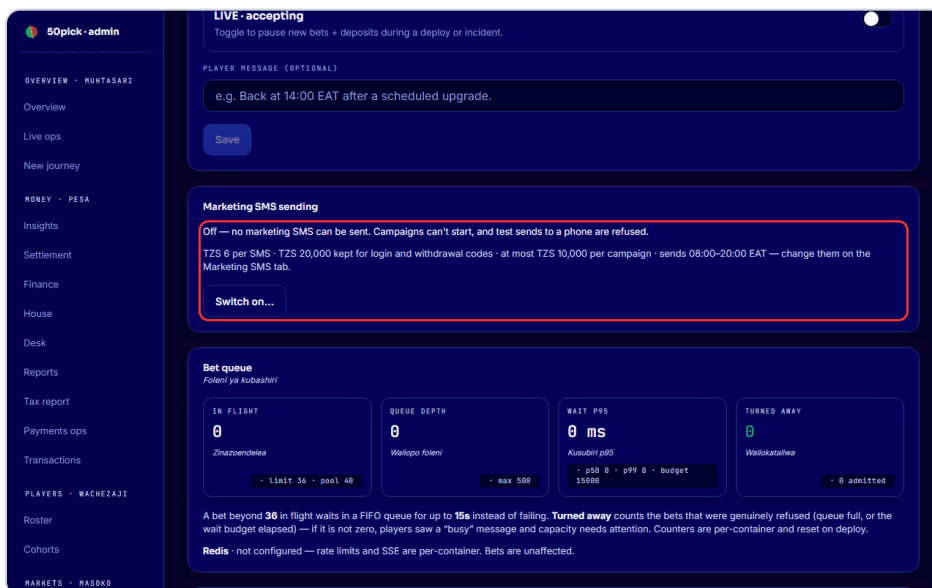

The tile shows	It means	Do this
A figure, and "Healthy"	The live balance, read just now.	Nothing — check it before a big campaign.
A figure, and "Low" in amber	The credit is below the alert level.	Ask the Owner to top up soon.
A figure, and "Below the TZS 20,000 floor" in red	The credit is below the part kept for login and withdrawal codes; marketing must wait.	Ask the Owner to top up now.
A dash, and "reload in a few seconds"	The balance is still being read.	Reload the page after a few seconds.
A dash, and "Couldn't read the balance"	The SMS company did not answer this time.	Reload later. If it stays, tell the Owner.
A red dash, and a setup note	The SMS connection is not set up correctly on the server — no SMS can be sent, login codes included.	Tell the Owner at once.

4.2 The Owner's switch

System → the "Marketing SMS sending" card

1. Nothing is sent while marketing SMS are switched off — not a campaign, not a test.
2. The Owner presses Switch on..., chooses for how long (30 minutes to 24 hours) and confirms. It switches itself off at the end; Switch off now stops it at once.

4.3 The Owner's settings

System → the “Marketing SMS” tab

1. Here the Owner sets the price per SMS, the credit kept for login and withdrawal codes, the most one campaign may spend, and the sending hours (08:00–20:00 EAT unless changed).

The screenshot shows the 50pick admin interface with the 'Marketing SMS' tab selected. The left sidebar contains navigation links for Overview, Live ops, New Journey, MONEY · PESA, Insights, Settlement, Finance, House, Desk, Reports, Tax report, Payments ops, Transactions, PLAYERS · WACHEZAJI, Roster, Cohorts, and MARKETS · MASOKO. The main content area has a top navigation bar with 'Platform', 'Marketing wordings', 'Marketing SMS' (selected), 'Public policy lines', and 'Diagnostics'. Below this, the 'Marketing SMS' section contains several input fields and a 'Save' button. The fields are: 'PRICE PER SMS (TZS)' with a value of 6; 'KEPT FOR LOGIN AND WITHDRAWAL CODES (TZS)' with a value of 20000; 'MOST ONE CAMPAIGN MAY SPEND (TZS)' with a value of 10000; 'SEND WINDOW STARTS (EAT)' with a value of 08:00; and 'SEND WINDOW ENDS (EAT)' with a value of 20:00. A 'Save' button is at the bottom right of the form.

5 Write a campaign

5.1 Write the message

Growth → SMS campaigns → New campaign

1. Name the campaign — only staff see the name.
2. Write the Swahili message; it must begin with 50pick. {jina} prints the person's first name — then give the word printed when a name can't be used (for example Rafiki).
3. English is optional: players whose account language is English get it; everyone else gets Swahili.
4. The message must fit in one SMS, and it is sent exactly as you write it — nothing is added. The counter shows the room left (12 characters are kept for {jina}).

The screenshot shows the 50pick admin interface with the 'Write the message' form. The left sidebar is the same as in the previous screenshot. The main content area has a top navigation bar with 'Platform', 'Marketing wordings', 'Marketing SMS' (selected), 'Public policy lines', and 'Diagnostics'. Below this, the 'Write the message' section contains several input fields and a 'Save draft' button. The fields are: 'SWAHILI WORD FOR {JINA}' with a value of Rafiki; 'ENGLISH MESSAGE (OPTIONAL)' with a value of 50pick: Hello {jina}! Big things are coming soon, and what's hidden will be revealed. Stay tuned, you won't want to miss it!; and 'ENGLISH WORD FOR {JINA}' with a value of Friend. A 'Save draft' button is at the bottom right of the form.

5.2 Fix what the composer marks

Growth → SMS campaigns → New campaign

1. A curly quote or an emoji makes the message hold far fewer characters. Press “Replace with plain characters”, or retype it.
2. Too long? The composer says how many characters you have.

SWAHILI MESSAGE
50pick: Karibu {jina}! Bashiri "leo".

Unicode cuts this message to 70 characters — replace: " (curly opening double quote), " (curly closing double quote).
27 characters left · 1 message · Unicode
Forced to Unicode by: " (curly opening double quote), " (curly closing double quote)

Replace with plain characters

Sent exactly as written — nothing is added to it.
{jina} keeps 12 characters for the name.

SWAHILI WORD FOR {JINA}
Rafiki

Printed when a name can't be used — letters only, at most 12.

ENGLISH MESSAGE (OPTIONAL)

5.3 Choose who receives it

Growth → SMS campaigns → New campaign → Audience

1. Choose the contact book, player accounts, or both, then narrow it with a list, a tag, an operator or the other filters.
2. The card counts who will receive it and who won't, with the reason for each — stopped, no consent and so on.
3. A campaign always goes to a group — never to one phone number.

50pick-admin

No consent or recorded basis	1
Withdrawn consent	0

5.4 Save, and send a test

Growth → SMS campaigns → New campaign → Save draft, then Test send

1. Press Save draft — the line beside it says when, and that nothing was sent.
2. Send the test to My own number. The Owner and Compliance can also choose Another number: type it, and tick the box that the person who uses it is 18 or older — only for someone who expects the test.
3. The test is the saved message, exactly as a recipient will get it. It is sent only while marketing SMS are switched on — up to 3 at once, then one every 10 minutes.
4. Saved drafts are in the SMS campaigns list; press a draft's name to open it again.

The first screenshot shows the 'Save draft' step. The message text is: '30 characters left · 1 message · GSM-7
Sent exactly as written — nothing is added to it.
(Jina) keeps 12 characters for the name.
English goes to players whose account language is English; everyone else gets Swahili.
ENGLISH WORD FOR {JINA}

50pick: Hello Asha! Big things are coming soon, and what's hidden will be revealed. Stay tuned, you won't want to miss it!
Send the Swahili test (highlighted) Send the English test (highlighted)
Up to 3 tests at once, then one every 10 minutes.
Confirm
Confirm audience... (highlighted)
Confirming freezes this message and this audience. Nothing is sent until someone presses Start on the campaign's page.

6 Confirm and start

6.1 Confirm the audience

Growth → SMS campaigns → the saved draft → Confirm audience...

1. The audience is counted at that moment: who will receive it, who won't and why, how many SMS it uses and what it can cost.
2. Five people or fewer: check the people it lists. More than five: type the number of people it shows.
3. Press Confirm audience. The message and the audience are then frozen — a confirmed campaign can't be edited.
4. Then press "Start it from its own page".

6.2 Start it

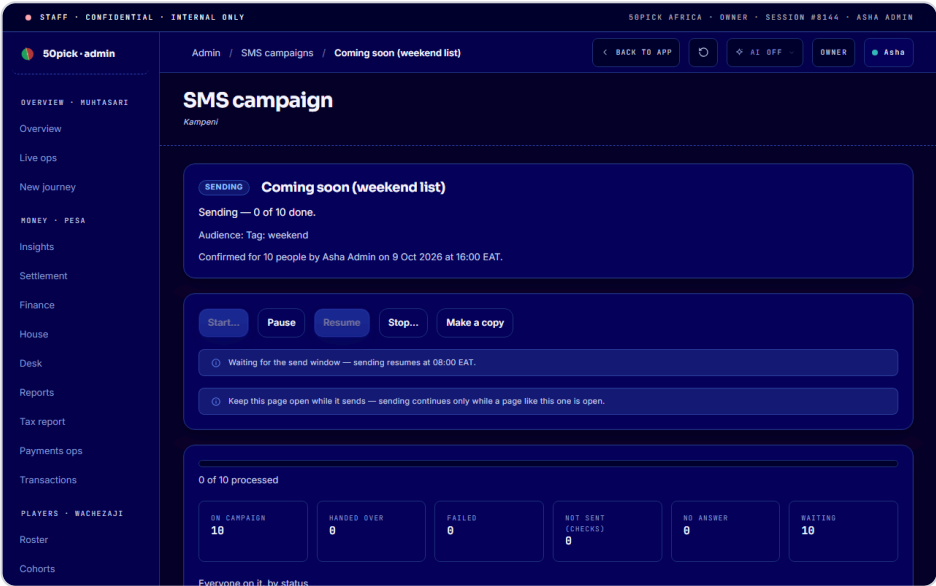

Growth → SMS campaigns → the campaign → Start...

1. Check the number of people, the sending hours and the most it can cost, then press Start sending.

6.3 Keep the page open while it sends

Growth → SMS campaigns → the campaign

1. The page first prepares the list, then sends, and shows how many are done.
2. Sending continues only while a page like this one is open. Close it, and sending waits until someone opens it again.
3. Outside the sending hours it waits, and says when it will go on.

7 Watch, pause, resume, stop

7.1 Read the figures

Growth → SMS campaigns → the campaign

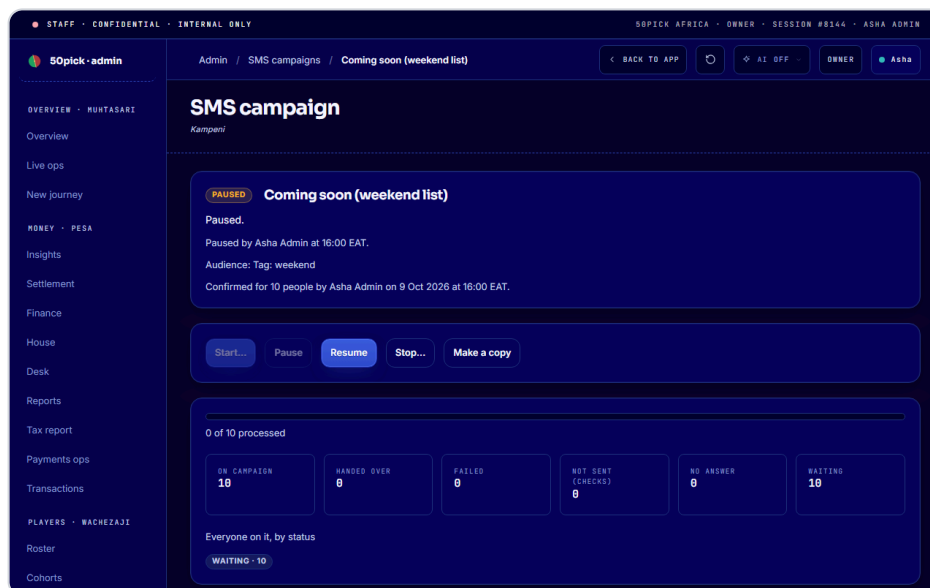

1. On campaign — everyone on its list. Handed over — the network took the message. Failed — it did not reach the person.
2. Not sent (checks) — the safety checks stopped them; that is not a fault. “Not sent, by reason” says why.
3. No answer — the network never replied; it is not sent again by itself. Waiting — still to go.

7.2 Pause and resume

Growth → SMS campaigns → the campaign → Pause, then Resume

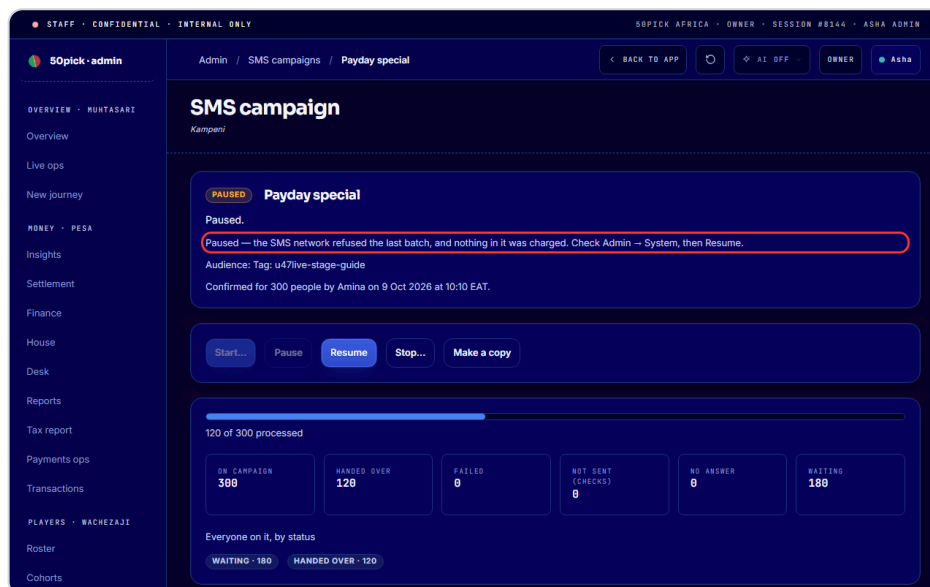

1. Pause stops anything new from starting; a group already being sent may still go out.
2. Resume checks the switch, the SMS network and the credit for what is left, then carries on.
3. The page says who paused it and when.

7.3 When a campaign pauses by itself

Growth → SMS campaigns → the campaign

1. The page says why, and what to do — for example, top up the credit, or wait for the switch.
2. Fix what it says, then press Resume.

7.4 Stop for good

Growth → SMS campaigns → the campaign → Stop...

1. A stopped campaign can't be restarted, and messages already handed to the network are not recalled.
2. Press Stop campaign in the dialog. The page then says who stopped it and how many people were not messaged.

The image shows a confirmation dialog on the left and the 'SMS campaign' details page on the right.

Confirmation Dialog:

- CONFIRM** (with a warning icon)
- Stop this campaign for good?**
- Text: "Nothing new will start sending. A group already being sent may still go out, and messages already handed to the network are not recalled. A stopped campaign can't be restarted. A copy would message everyone it reaches — including, again, the people this campaign already messaged."
- Stop campaign** (red button)
- Cancel** (white button)

SMS campaign Details Page:

- STOPPED Weekend kick-off**
- Stopped by Asha Admin at 16:00 EAT — 714 people were not messaged.
- Audience: Tag: u47live-stage-guide
- Confirmed for 1,604 people by Amina on 9 Oct 2026 at 10:10 EAT.
- Buttons: **Start...** (disabled), **Pause** (disabled), **Resume** (disabled), **Stop...** (disabled), **Make a copy** (active)
- Progress: 890 of 1,604 processed
- Summary Table:

ON CAMPAIGN	HANDLED OVER	FAILED	NOT SENT (CHECKED)	NO ANSWER	WAITING
1,604	820	8	60	2	714

Everyone on it, by status

WAITING - 709	HELD — COULDN'T BE CHECKED OR PREPARED - 5	HANDLED OVER - 700	DELIVERED - 120	FAILED - 8	NOT SENT (CHECKS) - 60
NO ANSWER - 2					

7.5 Make a copy

Growth → SMS campaigns → the campaign → Make a copy

1. A copy is a new draft with the same message and audience — check and confirm it like any campaign.
2. A copy messages again anyone the first campaign already reached.

The image shows the 'New SMS campaign' form with a warning message.

Warning Message:

- A copy was made as a new draft. Some people on this campaign have already been messaged, and the copy would message them again when it is sent.**

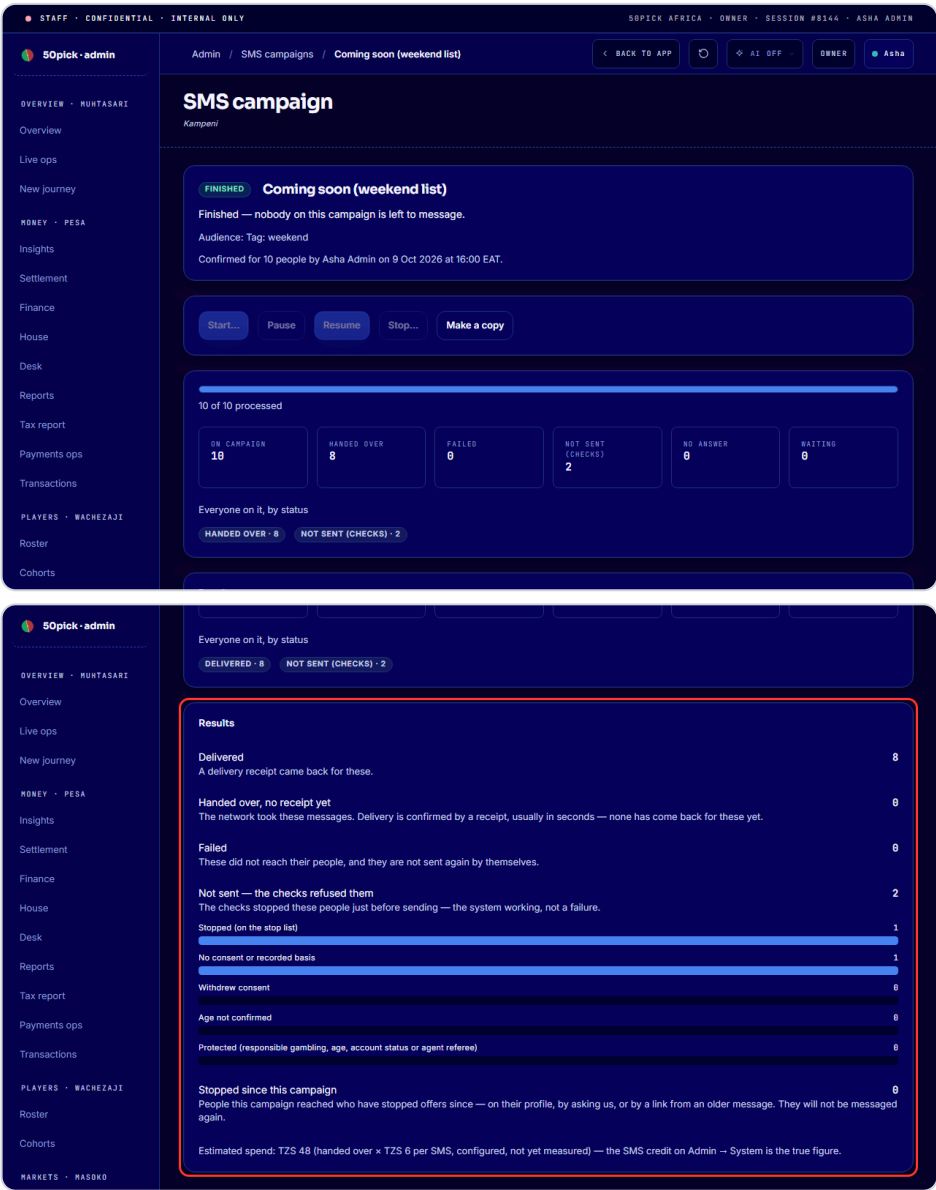

New SMS campaign Form:

- Message** (Ujamba)
- CAMPAIGN NAME**: Weekend kick-off (copy)
- Only staff see it — it is never sent.
- SHANILI MESSAGE**: 5Opick: Habari (jina), ofa ya leo.
- Begin with 5Opick (lower case). (jina) prints the first name.
- 120 characters left - 1 message - GSM-7
- Sent exactly as written — nothing is added to it.
- (jina) keeps 12 characters for the name.
- SHANILI WORD FOR (JINA)**: Rafiki
- Printed when a name can't be used — letters only, at most 12.

8 Results

Growth → SMS campaigns → the campaign

1. When nobody is left to message, the campaign says Finished. Its Results are further down the page.
2. Delivered — a delivery receipt came back. Handed over, no receipt yet — the network took it; receipts usually come in seconds.
3. Failed, and “Not sent — the checks refused them”, say who did not get it and why.
4. Stopped since this campaign — people this campaign reached who have stopped offers since.
5. The estimated spend is shown to the roles that may see money; the SMS credit on System is the true figure.

9 Your first campaigns

Do these in order before any big send.

1. Send yourself the test in Swahili and in English. Read it on the phone, and check the name and the words.
2. Pilot: a list of 5 to 10 staff numbers who agreed to receive offers. Confirm, start, keep the page open until it says Finished, and check that Results shows Delivered.
3. First real campaign: 100 to 200 people. Check Results and the SMS credit afterwards.
4. Then grow step by step — 1,000, then 5,000 — checking the SMS credit before each one.
5. A campaign of 1,000 people uses about 1,000 SMS, about TZS 6,000. Each campaign is held to the Owner's cost limit (TZS 10,000 unless the Owner changed it — about 1,600 people); for a bigger one, the Owner raises it first.
6. Send during the day, well inside the sending hours, and never send the same message to the same people twice.

10 Safety

1. Nothing is sent while the Owner's switch is off, or outside the sending hours.
2. The credit kept for login and withdrawal codes is never spent on marketing — a campaign pauses first.
3. A campaign can't cost more than its limit; Start refuses it.
4. Each person is checked just before their message: stopped, withdrawn and self-excluded people are skipped.
5. A message is sent exactly as written. Players can turn offers off under Profile → Notifications, and anyone who stopped is never messaged again.
6. Your role decides what you see and do; every action is recorded with your name and the time.
7. If anything looks wrong, press Pause, then ask.

11 Messages you may see

Contacts

Message	It means	Do this
<i>This number is already in the book.</i>	The number is a contact already.	If “Open the existing contact →” is shown, press it and edit that contact; if it isn’t, there is no contact you can open for that number — leave it, it can’t be added again.
<i>This number is in the book.</i>	A whole-number search shows no rows: always for a role that can’t see phone numbers, and for one that can when the book holds the number but has no contact you can open for it.	To record a stop or a withdrawal for it, press “Select this number”, then Suppress or Record a withdrawal. Search by name to see contacts.
<i>This number is not in the book.</i>	The same answer the other way: the number is not a contact.	Add it with Add contact, or search by name.
<i>Too many checks against the book — wait 30 seconds, then try again.</i>	Each officer has one limit of checks against the book, shared by the search box, the Add form’s number check and the bulk bar’s count.	Wait as long as it says, then try again.
<i>A name can’t hold a phone number — remove the number from the name.</i>	Names show to every staff role.	Take the digits out of the name.
<i>A tag can’t hold a phone number.</i>	Tags show to every staff role.	Use a word (“vip”, “event-oct”).
<i>This doesn’t look like an email address (name@example.com).</i>	The email is not a complete address.	Fix it, or leave it empty.
<i>Someone changed this contact after you opened it, so nothing was saved. Reload to see the latest version, then make your change again.</i>	Two people edited the same contact.	Reload, check their change, then make yours.
<i>Your role can view contacts but not add or change them — ask an officer with Growth access.</i>	Your role is view-only here.	Ask an officer with Growth access, or the Owner.
<i>A Tanzanian number has nine digits after +255; this one has 8. Check whether some digits were cut off.</i>	A digit or more is missing.	Check the number and type it again.
<i>This is an international number outside Tanzania (country code +254...). 50pick sends only to Tanzanian mobile numbers.</i>	Only Tanzanian mobiles can be added.	Ask for their Tanzanian mobile number.
<i>The selection changed while it was being read: it now holds 120 contacts, not 118. Nothing was changed; review it again.</i>	Contacts joined or left the selection meanwhile.	Review it again — the confirmation counts afresh.
<i>For your role a whole number shows only whether it is in the book, so only Suppress and Record a withdrawal act on it — clear the search, or search by name, to tag, list or remove contacts.</i>	Tag, Untag, Add to list and Remove can’t act on a whole-number search for a role that can’t see phone numbers (the bar disables them for “Select this number”).	Clear the search or search by name. A stop or a withdrawal for the number still works.

Message	It means	Do this
<i>A tag made from the "Consent" filter would let staff who may not use that filter find these contacts through that tag. Tag these by ticking them by hand, or filter by something else.</i>	A tag or a list built from the Consent, Suppressed, Source or Player filter is refused for every role.	Tick the contacts by hand, or filter by something else.
<i>For your role a whole number shows only whether it is in the book, so nothing was exported. Clear the search, or search by name, then export again.</i>	A whole-number search can't be exported by a role that can't see phone numbers.	Clear the search, or search by name, then export.
<i>Only the contacts this import adds join the list — numbers already in the book stay as they are.</i>	The import was uploaded or started by a role that can't see phone numbers.	Nothing — a contact already in the book can be added to a list from the book.
<i>No contact joined the list Weekend players — only the contacts this import adds join the list, and it added none.</i>	The import was uploaded or started by a role that can't see phone numbers, so only the contacts it adds join its list — and it added none.	Nothing — add contacts already in the book to the list from the book.
<i>3 more members have a 50pick account — a list basis never reaches them.</i>	Members with a 50pick account are reached only through their own consent, never through the list's basis.	Nothing — they get offers only if they agreed to them.

Writing a campaign

Message	It means	Do this
<i>The Swahili message is required — it is the one every recipient can be sent.</i>	The Swahili message is empty.	Write the Swahili message.
<i>A campaign goes to a group, never to one phone number — take the number out of the audience. To see the message on a phone, use the test send: it goes to your own number.</i>	The audience is one phone number.	Choose a group; use the test send for one phone.
<i>The character "... " is not in the GSM alphabet, which cuts a message from 160 characters to 70. Replacing it is usually enough.</i>	A special character makes the SMS hold far fewer characters.	Press "Replace with plain characters".
<i>This is 2 messages, and the limit is 1 — you have 148 characters, and this uses 171.</i>	The message is too long.	Shorten it until the counter fits.
<i>Marketing SMS are not switched on yet — a test is refused until the Owner switches them on.</i>	Sending is off.	Ask the Owner to switch marketing SMS on.
<i>Couldn't save — your text is still here. Try again.</i>	The server did not answer this time. Nothing is lost.	Try again; if it keeps failing, reload, then tell the Owner.
<i>Save first — the test sends the saved text.</i>	The test uses the saved message.	Press Save draft, then send the test.
<i>Nobody matches this audience yet.</i>	Nobody in this audience may receive the campaign.	Choose a wider audience.

Starting

Message	It means	Do this
<i>Marketing SMS are switched off. The Owner switches them on (Admin → System → Marketing SMS sending), then you can start. Nothing was sent.</i>	The Owner's switch is off.	Ask the Owner to switch them on, then press Start again.
<i>At today's price this campaign could cost TZS 12,000 — more than its limit of TZS 10,000. Stop it and confirm a smaller copy, or the Owner raises the limit. Nothing was sent.</i>	The campaign could cost more than its limit.	Confirm a smaller copy, or ask the Owner to raise the limit.
<i>Starting would leave less SMS credit than is kept for login and withdrawal codes — credit TZS 25,000, this campaign up to TZS 9,000, kept for codes TZS 20,000. Top up, or narrow the audience. Nothing was sent.</i>	Not enough credit for this campaign and the codes.	Ask the Owner to top up, or narrow the audience.
<i>The audience grew since it was confirmed — now 1,250, confirmed 1,200. Nothing was sent. Stop this campaign and confirm a new copy.</i>	People joined the audience after it was confirmed — new contacts, for example.	Stop it and confirm a new copy.

Sending

Message	It means	Do this
<i>Keep this page open while it sends — sending continues only while a page like this one is open.</i>	This page is what keeps the campaign going.	Leave the page open until it says Finished.
<i>Waiting for the send window — sending resumes at 08:00 EAT.</i>	Outside the sending hours.	Nothing — it goes on by itself when the window opens.
<i>Waiting a moment — the platform is paying out or taking bets, and money always goes first. Sending resumes by itself.</i>	Payouts and bets come first.	Nothing — it goes on by itself.
<i>Waiting — a login or withdrawal code failed in the last two minutes, so marketing steps aside. It tries again at 14:10 EAT.</i>	Login codes come first.	Nothing — it tries again by itself.
<i>Nobody is sending this campaign right now. Open it as an officer who can send, and keep the page open.</i>	No page is open to keep it going.	Open the campaign and keep the page open.
<i>This page is out of date or lost its connection — reload it to keep sending. Nothing is lost.</i>	The page lost touch with the server.	Reload the page.

Paused

Message	It means	Do this
<i>Paused — the SMS credit reached what is kept for login and withdrawal codes. Top up, then Resume.</i>	The credit ran down to the part kept for codes.	Ask the Owner to top up, then press Resume.
<i>Paused — marketing SMS are not switched on: the Owner switched them off, the time they were switched on for ran out, or the switch couldn't be read. Once Admin → System shows them on, press Resume.</i>	The switch is off.	Ask the Owner to switch them on, then press Resume.
<i>Paused — the SMS network refused the last batch, and nothing in it was charged. Check Admin → System, then Resume.</i>	The SMS company said no to the last group.	Check System; press Resume when it is healthy.
<i>Paused — some people could not be checked or prepared. Resume to try them again, or Stop.</i>	A few people couldn't be checked.	Press Resume to try them again.
